New **RED ROCKET**

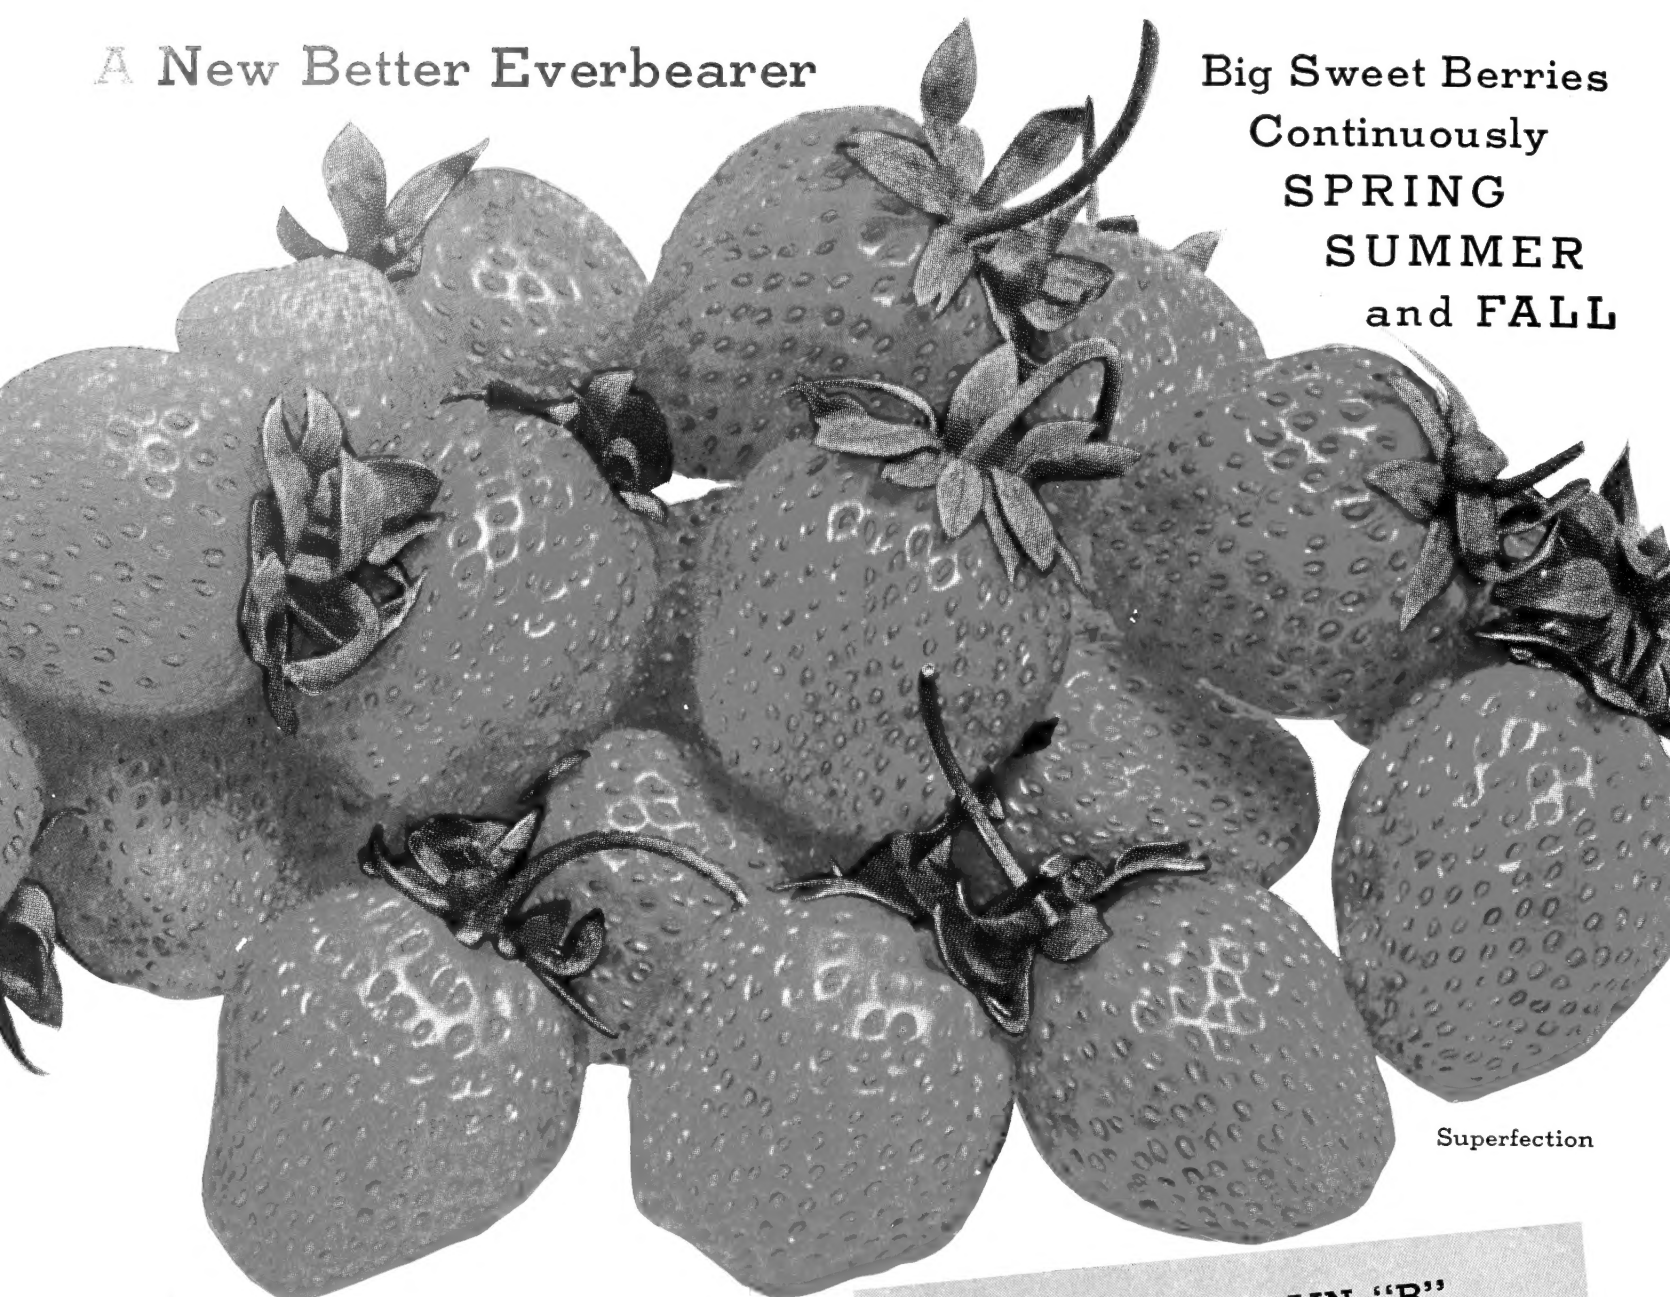

YELLOW FREESTONE PEACH

The most attractive peach we have ever seen. It simply has everything—Large size, dark red color that is almost black when fully ripe, and very firm when highly colored. Excellent flavor and a tough skin. Trees are hardy and thrifty. Commercial growers should try Red Rocket and every home garden should plant a few. See page 17 for full description.

Price: 9, 16 trees, \$1.95 each; 10 for \$15.00

A New Better Everbearer

Big Sweet Berries
Continuously
SPRING
SUMMER
and **FALL**

Superfection

New!
SUPERfection
EVERBEARER

WILL START FRUITING 90 DAYS AFTER PLANTING
The Only True **EVERBEARING** Strawberry

At Last we have a new variety Everbearing strawberry that we firmly believe will replace all others in time.

The New Superfection, propagated in northern Michigan has naturally taken on the hardiness of any variety originated in that section, and it should prove popular in other localities.

Makes Plants Freely. Due to its Gem parentage it will produce new plants more freely than any Everbearer we know of; plants are large with leathery-like appearance.

Sweet Juicy Berries. Plants produce big red, rich colored berries shortly after setting; they are more firm, better flavored than any other Everbearer and will absolutely not discolor after picking.

SPECIAL BARGAIN "B"

100 of the finest strawberry plants grown. 50 Everbearers and 50 June bearers. Four of the best varieties, 25 each prepaid by parcel-post to your door.

25 Scarlet Beauty
25 Streamliner
P. P. PREPAID, All for

\$5⁵²

Continuous Bearer. Superfection gains its great popularity from the fact that it bears continuously from a short time after it is planted until cold weather.

Excellent Shippers. These berries are slightly rounded and of very firm texture, thereby withstand shipping great distances without damage.

Best by Test. We have tested Everbearing varieties for years; it is our opinion that Superfection is by far the best presented to the public in twenty years.

Give This New Everbearer a Trial. If they do well under your climatic condition, order them in large quantity with confidence they will produce big profits.

STAHELIN'S THRIFTY PLANTS WILL GIVE YOU A QUICK SURE START

Stahelin's Quality Plants Will Give You The Start You Need For Profitable Fruit Production

To you fine people who have been buying from us in the past, we again wish to say, "Hello."

A great many changes have been occurring since you received our last catalog. We have had a merry-go-round of rising prices, and this same condition applies to us, as well as to you. Yet, for about three years we have been able to keep our prices at the same point, and this season we are reducing prices on some items.

Our location here in the cold section makes for hardiness. Our sandy loam, heavily fertilized, produces a fibrous-rooted plant unequalled anywhere. On this basis we solicit your patronage. Send us your order as early as possible. We can handle it better if you do so. **WE SINCERELY URGE YOU TO KEEP THIS CATALOG FOR TWELVE MONTHS.** You can order out of it this fall. We guarantee no price increase. Orders can be booked during the summer months or early fall and the stock will be shipped to you just as soon as it is ready to dig. We must always have some cold weather on nursery stock to harden it up before it can be safely transplanted and the stock will be shipped as soon as this has occurred.

DON'T WAIT TO ORDER

Our customers have been very fine in the past few years in placing their orders early. Please remember that the shipping of strawberry, asparagus and that class of plants depends entirely on weather conditions here. **WE POSITIVELY DO NOT SHIP ANY STORAGE PLANTS.** We will endeavor to fill your order as close to the time specified as we can, but if excessive rain or cold weather hits us at that time of the year there may be a slight delay.

10% CASH DISCOUNT

Orders received during January at the prices quoted in this catalog, **with cash in full enclosed**, are subject to a 10% discount. This amount to be deducted from your remittance. Special prices or quotations by mail not subject to discount. **THIS DISCOUNT NOT GOOD AFTER FEBRUARY 1st, 1949.**

FALL SHIPMENTS

We encourage the fall planting of nursery stock. Plants and trees are dormant then, and when warm weather comes in the spring your stock is ready to commence growing. Nursery stock can't be shipped until it has had some cold weather to harden it up, and fall shipments are usually made after the middle of October. **NO DISCOUNT ON FALL ORDERS.**

C.O.D. ORDERS

We can ship C.O.D. if order amounts to \$3.00 or more at full catalog price, no discount allowed, but 10c on each dollar must be included with your order as a down payment. If order amounts to \$3.00, send 30c with order; if \$4.00, send 40c, etc. You may inspect express shipments before you pay. (Parcel Post not subject to examination.) If satisfactory, pay the agent the amount due.

IMPORTANT

All stock listed in this catalog is for the customer to pay the transportation charges, as the weight of nursery stock cannot be determined exactly in advance of shipment.

NOTICE

For approximate shipping charges, refer to the back of our order sheet enclosed with this catalog. Complete schedules and rates, as closely as it can be figured will be found there.

CERTIFICATE OF NURSERY INSPECTION

Michigan State Department of Agriculture—Orchard and Nursery Inspection No. 1100.

This is to certify that the nursery stock of Stahelin's Nursery, Bridgman, Michigan, has been examined and found to be apparently free from dangerous insects and dangerously contagious tree and plant diseases. Fee paid \$40.30.

Chas. Figy, Commissioner,
Lansing, Mich.

Bureau of Agricultural Industry,
C. A. Boyer, Director.

August 26, 1948.

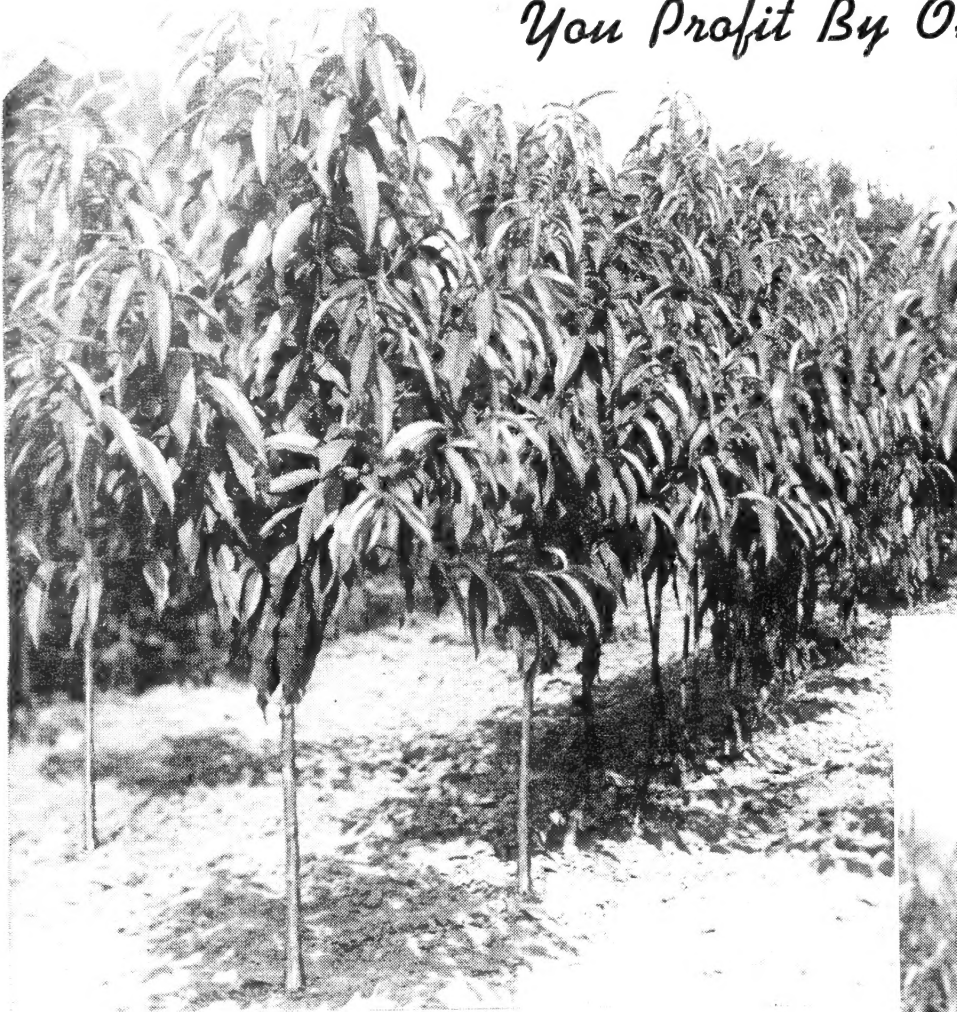

STAHELIN'S GUARANTEE

All nursery stock you buy from Stahelin's is guaranteed to arrive in first class condition, and be free from disease, if shipped by express or mail. We assume no responsibility for freight shipments. **If for any reason you are not satisfied, we must be notified as soon as stock is received.** As our nursery stock is guaranteed to arrive in a live condition, our responsibility ceases as soon as stock is planted, for we cannot be responsible for weather or other conditions beyond our control. If through error, any stock proves untrue to name, it will be replaced free of charge the following season. At no time are we responsible for more than the original cost of the stock.

You Profit By Our **EXPERIENCE**

Both as **NURSERYMEN** *and* **FRUIT GROWERS**

Now, the above heading should mean a lot to anyone interested in fruit growing. We maintain in actual commercial production over 100 acres of peach and apple trees. So dissatisfied were we with the trees purchased to make part of these plantings, that we decided at that time to produce our own trees for restocking and for reselling. Our soil produces such fibrous roots, as well as nice straight-bodied trees, that our business has increased over 500% in the last few years, and is still growing, so that our budding for 1949 will run several hundred thousand peach, apple, pear, cherry and plum.

Husky peach trees we are digging to fill your order this spring

Vigorous roots that will give a quick start

Note the uniform thrifty growth of these Stahelin trees

**Stahelin's Healthy Plants
Insure a Full Crop**

We grow and produce probably more grape vines than any other firm in the Middle West. The field at the right contains 330,000 cuttings. Each plant at present writing September 2nd measures 20 inches in height with a wonderfully large root system. Healthy cuttings taken from the best vineyards assures you of getting better plants.

The above fine root system on our trees insures you of getting quick growth and maturity after they are planted. Cherry trees is one of our specialties. We grow thousands of them from the finest parent trees and from buds selected by the State and grown under State supervision.

Part of our 2 year grape plantings

Giant Cultivated BLUEBERRIES

The Greatest Development in Fruit Growing

The cultivated blueberry will bring you more cash money per acre than any other type of berry plant that we know of today.

These marvelous berries can be grown on any soil that is moist or damp as long as it has a slight acid reaction. The size of the fruit is remarkably large and the quantity is such that you can't describe them. It is unfortunate that everyone of our customers can't see these fruits in bearing or they would have at least a dozen in their garden. We are offering one year plants at a low price this year and you can get started at a very low cost.

"Low Cost Way" BLUEBERRIES

The low cost way of starting a blueberry field at 25c each in lots of 100. You can start very cheaply. Grow them in nursery rows for two years and you get a fine 3 year plant at low cost. **Priced Below.**

Showing a 5-year plant in full production

We offer a few such plants in the Jersey variety that will be from 24-30 in., well branched, and from 5 to 8 years old. **PRICE: \$4.75 each; 2 for \$8.95.**

RANCOCAS Very Early

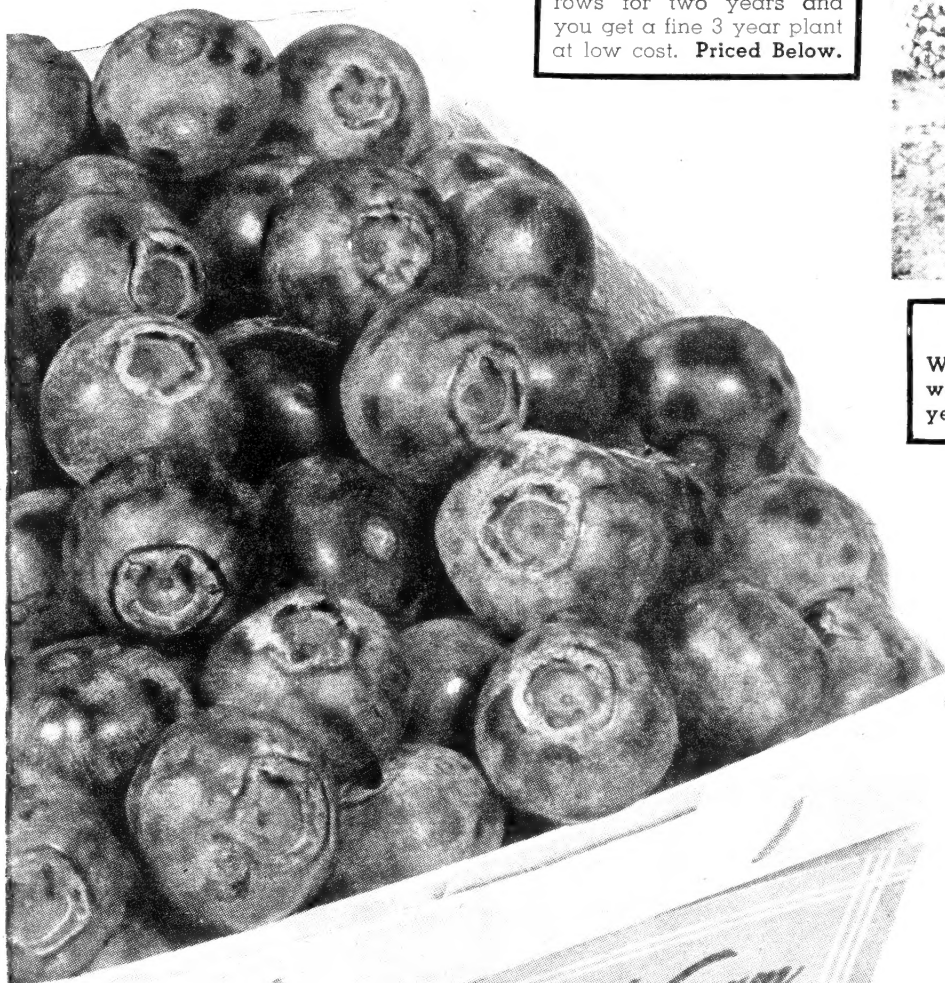

Is of excellent quality, and a very good shipper. The bush does not grow quite as tall as Rubel, but it produces a lot of fruit over a long picking season. **Priced below.**

JERSEY Midseason

In our opinion, Jersey is superior to some of the other blueberries. The bush is very upright, vigorous and a large producer. The fruit is enormous in size, very attractive, firm and very sweet. We recommend Jersey for home use as well as shipping. **Priced below.**

RUBEL Late

This variety was one of the first that was offered to the public, and has continued down through the years to be one of the best. Is a parent of many of the present hybrids. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large size fruit, and a heavy bearer. **Priced below.**

Giant THORNLESS-BOYSENBERRY

EARLY RIPENING SEASON

The New Thornless Boysenberry is an off-spring of the common thorny type Boysenberry. It is a sport that has been carefully selected and improved until it is practically free of thorns. It has the same size as the common Boysenberry, often measuring from 2 to 3 inches in length. It ripens 10 days to 2 weeks earlier than the common Boysenberry, which gives it a decided advantage for the grower who wishes to get his berries on the market while prices are at the top. In the selection of plants, size of fruit was also taken into consideration, as well as ripening season, so the new Thornless Boysenberry is regarded as a superior strain of the old. Very highly regarded for culinary purposes.

Boysenberry

Thorny

BOYSENBERRY

THE LARGEST BERRY GROWN

This variety is of the Dewberry type, and must be placed on a trellis for best results. These dark maroon colored berries often measure from 2 to 3 inches in length.

Boysenberry has a distinctly different flavor, and when allowed to ripen on the vines is much sweeter than any other of the dewberry types. Is very juicy and sweet, and will hang for days on the vines after it is ripe. Is quite hardy, and ripens a few days earlier than the dewberry.

{ 4 }

ALFRED

It is the most coreless blackberry that we have. It succeeds almost everywhere. Is of excellent flavor, very firm, and the size holds up well to the end of the picking season. Has very small seeds. Hardy, and has withstood 30 degrees below zero. Has long picking season. Ripens a few days earlier than Eldorado. The plant is a very vigorous grower, and at no time has been infected with common blackberry diseases. Its Michigan origination makes it adaptable to all sections. PRICED BELOW.

ELDORADO

Produces a full crop of jet black berries of large size. Has a delicious aroma and flavor. Is an excellent shipper, retaining its rich glossy black color after being picked. Very small core, and is a favorite for canning. Extremely hardy. Most of the fruit is borne on the top part of the plants, and care should be taken when trimming not to cut it back too far. PRICED BELOW.

FREE CULTURAL INSTRUCTIONS INCLUDED WITH ORDER IF REQUESTED.

NEW Streamliner

THE PERFECT EVERBEARING STRAWBERRY—FRUIT ALL SUMMER & FALL

CHOICE OF THE NATION

We realize that it is hard to make people know just how good Streamliner is until they have seen it in fruiting. At that time it is fairly ablaze with big, red berries. Big, juicy, sweet as honey berries, and lots of them on every plant. Streamliner is the best everbearing variety that we have seen in the last twenty years, and as we introduced

Mastodon to the public in 1923, we believe that we should know something about everbearing varieties. This is the variety to plant for commercial purposes. It has fine color, is very firm, and the quality is equal to any. The New Streamliner has completely taken the country by storm, from the western part of the United States to the east and the south the Streamliner continues to make friends and is rapidly becoming

the most popular everbearing strawberry. This is the cause of its high performance, its large production, and the high price it commands on local markets.

EVERBEARING STRAWBERRY BARGAIN No. 1

25 Streamliner
25 Superfection **\$2.90**

Net, No Cash Discount

Large Size, Healthy Foliage, and Excellent Flavor

Streamliner commences to bear about fifty days after planting and continues to bear the second year as well as the first, which most everbearing varieties will not do. It is extremely sweet and produces berries as large as crab apples. The foliage is quite leathery and very healthy. Free of disease. A perfect flowering variety.

Hardy

Streamliner is especially hardy, doing well under all weather conditions where it has been grown. Makes plants quite freely. Produces lots of fruit early in the spring and late in the fall when all others are gone. Set this variety in your garden and have something fine in the way of fruit. Plant now for pleasure and sell your excess for profit.

PRICES

25 for	\$1.75	100 for	\$4.95	500 for	\$18.95
50 for	2.95	200 for	8.95	1000 for	37.50

The extremely heavy bearing quality of Streamliner requires an extraordinary large root system as shown on the photograph at right.

EVERBEARING STRAWBERRIES

MASTODON

3 Full Crops in 18 Months

So well known to our customers that we are not devoting much space to it. Stahelin's stock is of the original strain well known all over the United States, and is more widely planted than all others combined. Produces a large amount of fruit in the fall when all others are gone. Berries are large, presenting a wonderful appearance, and are easily picked. Should be planted on the very richest and dampest of soil. Perfect flowering. Produces a giant crop 60 days after planting.

PRICES

Mastodon

Famous GEM

The Favorite Everbearer. Back in 1935 we received under exclusive contract with the originator, our parent supply of this variety. It is the only everbearer that makes plants freely. The berry is dark red, pointed—about the size of Dunlap, of excellent quality, and has a sweet tart flavor. Will commence to bear about 60 days after planted, and will continue to do so all summer and up until cold weather sets in. Can be grown on soil where an ordinary everbearing would be a failure. Plants set in April or May start bearing in July and continue until winter. Bears two crops again next year.

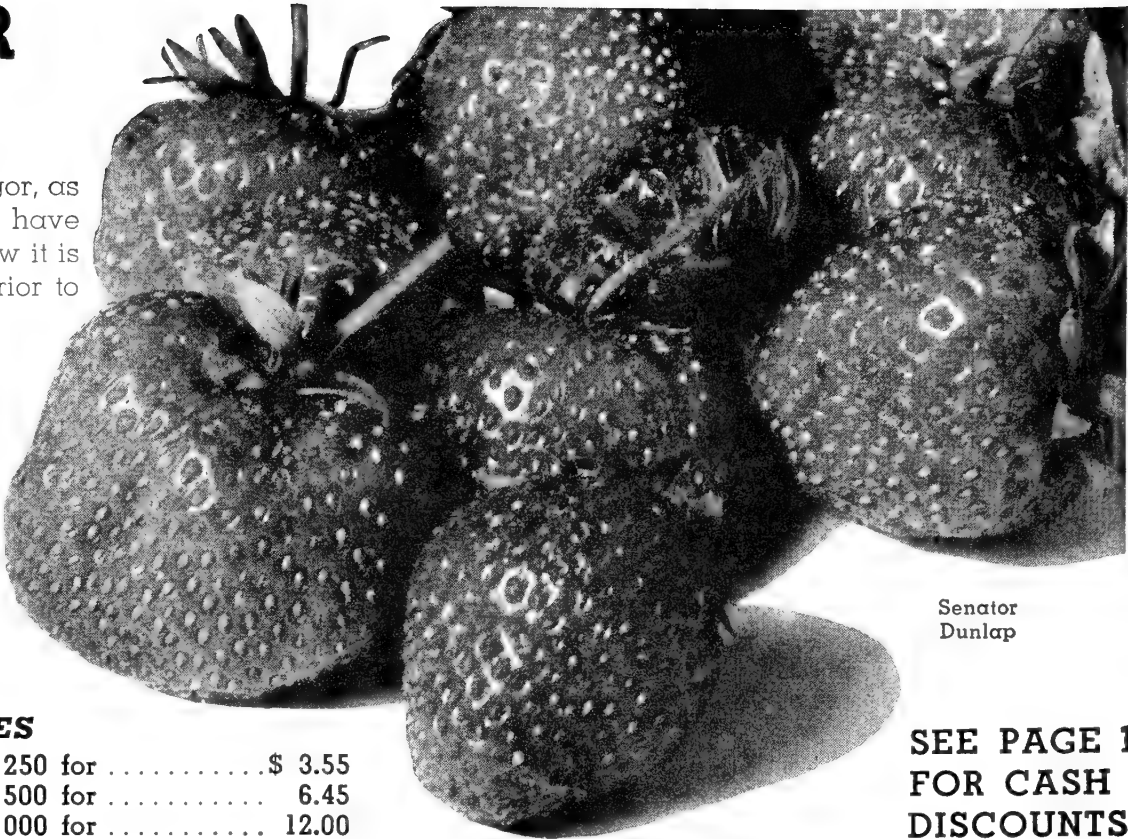

PRICES

100 for	3.65	1000 for	29.50

Gem

SENATOR DUNLAP

By our selection for health, vigor, as well as productiveness, we have improved this variety until now it is recognized as being far superior to the ordinary strain of Dunlap. The berries are a beautiful crimson color, large size, firm, and quite pointed. Its firmness makes it possible to be shipped to distant markets. The wonderful vigor of our strain of plants will fill your rows a long time before any of the others get fairly started.

Stahelin's PREMIER

Famous For Its
"Frost-Proof" Qualities

By means of careful plant selection, which we have been doing for a number of years, we have perfected a strain of Premier that we know will produce more plants per acre than any other strain of Premier. Our Premier is adapted to all soil and climatic conditions. The picking season is long, commencing with the first and continuing to produce large size fruit until the late varieties are practically over. Premier is very easily picked, and easily sold because of their large size.

Frost-Proof

Stahelin's Premier is practically immune to late spring frost and if you are located in a section where such trouble occurs, you can be assured of getting a fine crop if you will plant our Premier. This is due to the peculiar plant growth which it makes, almost completely hiding the blossom and protecting it from severe cold.

Excellent Shipper

An extremely juicy berry, yet quite firm, making it an excellent shipper. It comes on the market when there are practically no other

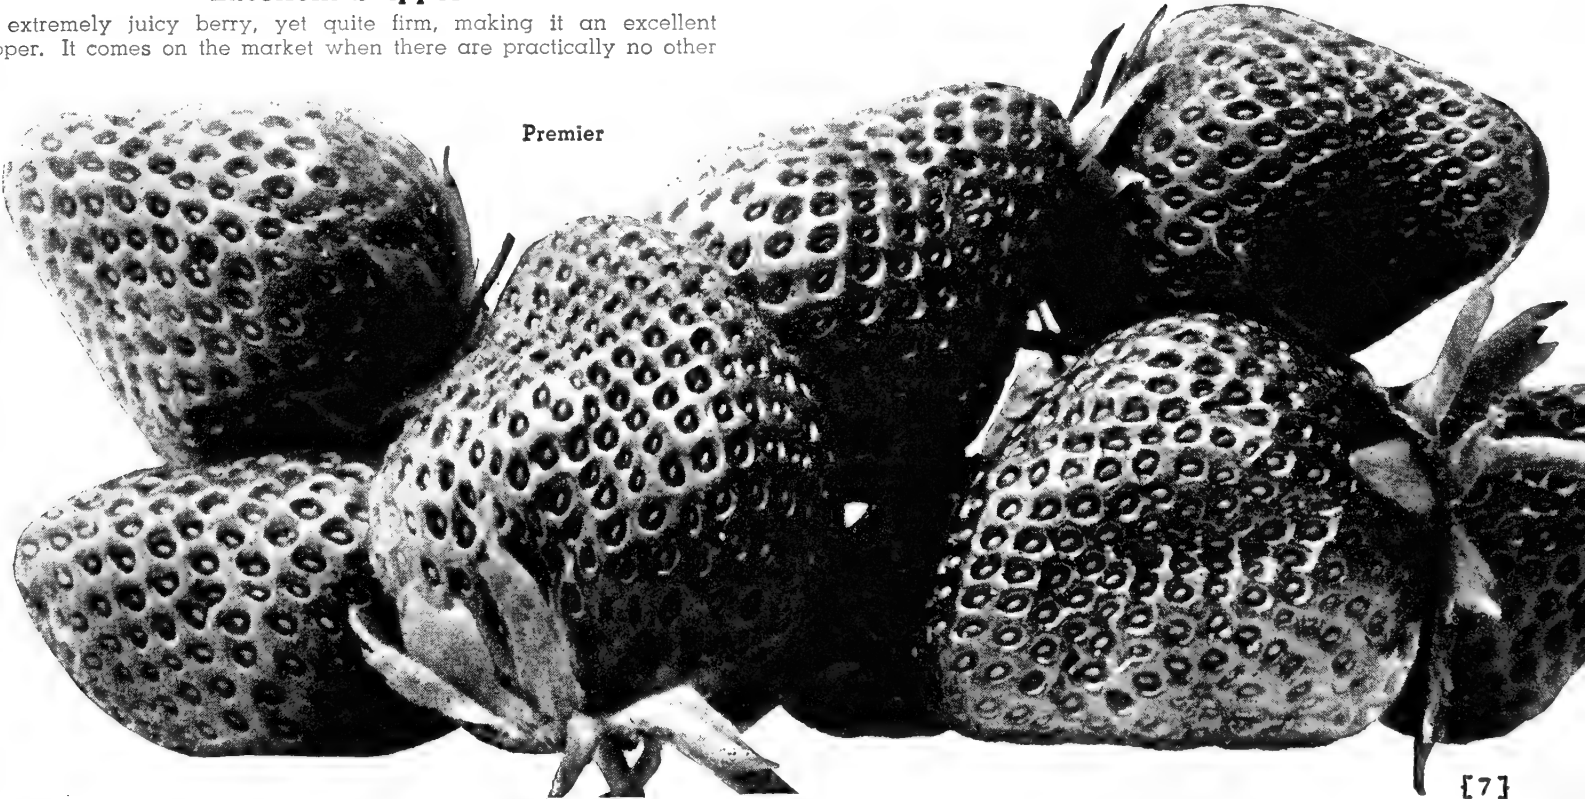

strawberries. Most of the fruit is pointed, although the berries are of various shapes, resembling most all varieties of strawberries. They are of bright showy red, and have a large calyx. If you want a big crop of fine fruit that will stand a lot of extreme cold weather when they are in blossom and not freeze, plant Stahelin's Premier.

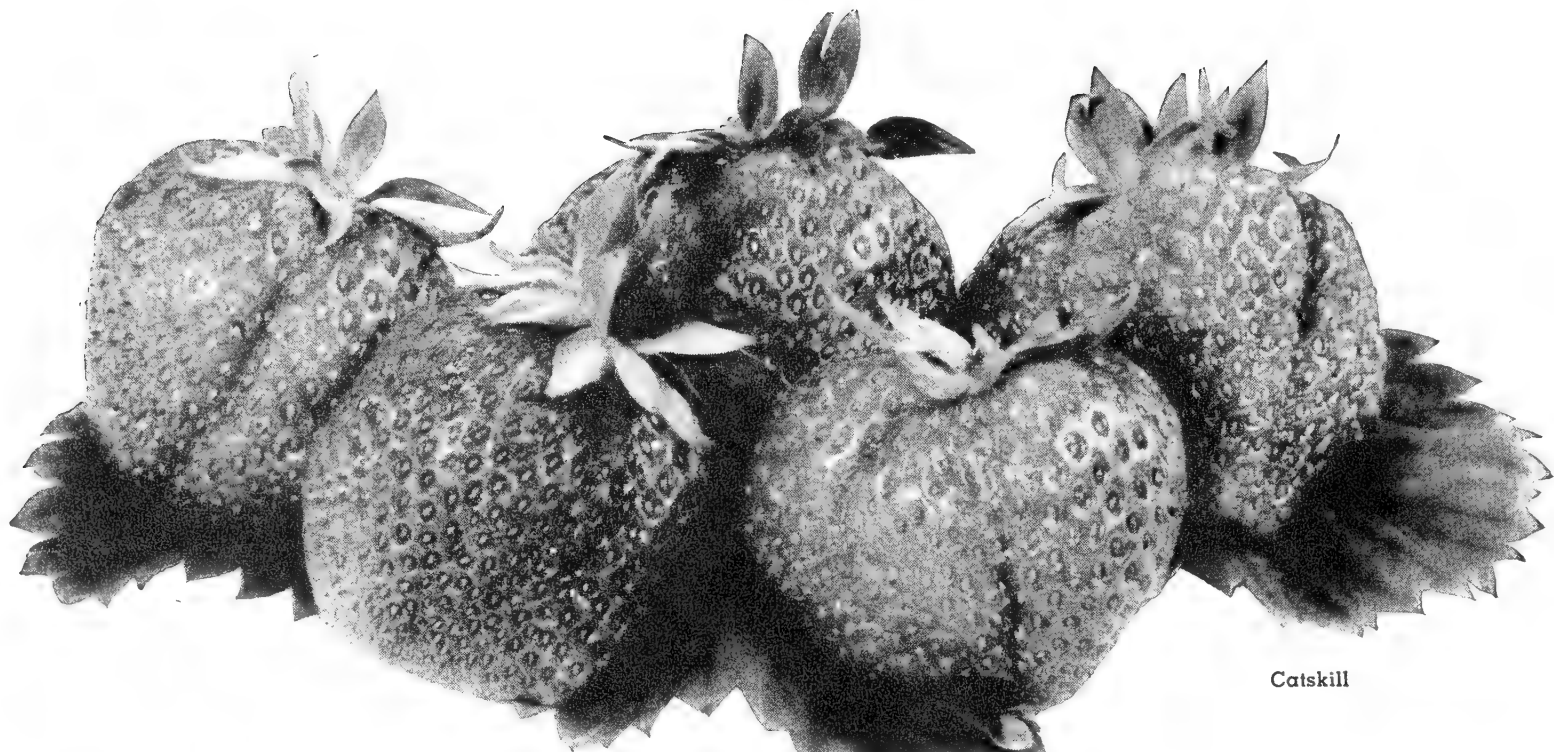

PRICES

25 for	\$1.10	250 for	\$ 6.10
50 for	1.90	500 for	8.95
100 for	2.85	1000 for	16.95
2000 for	\$33.00		

Commercial plantings of Premier in lots of 10,000 or more can be furnished at special prices. If interested in lots of this size write us.

Premier

Catskill

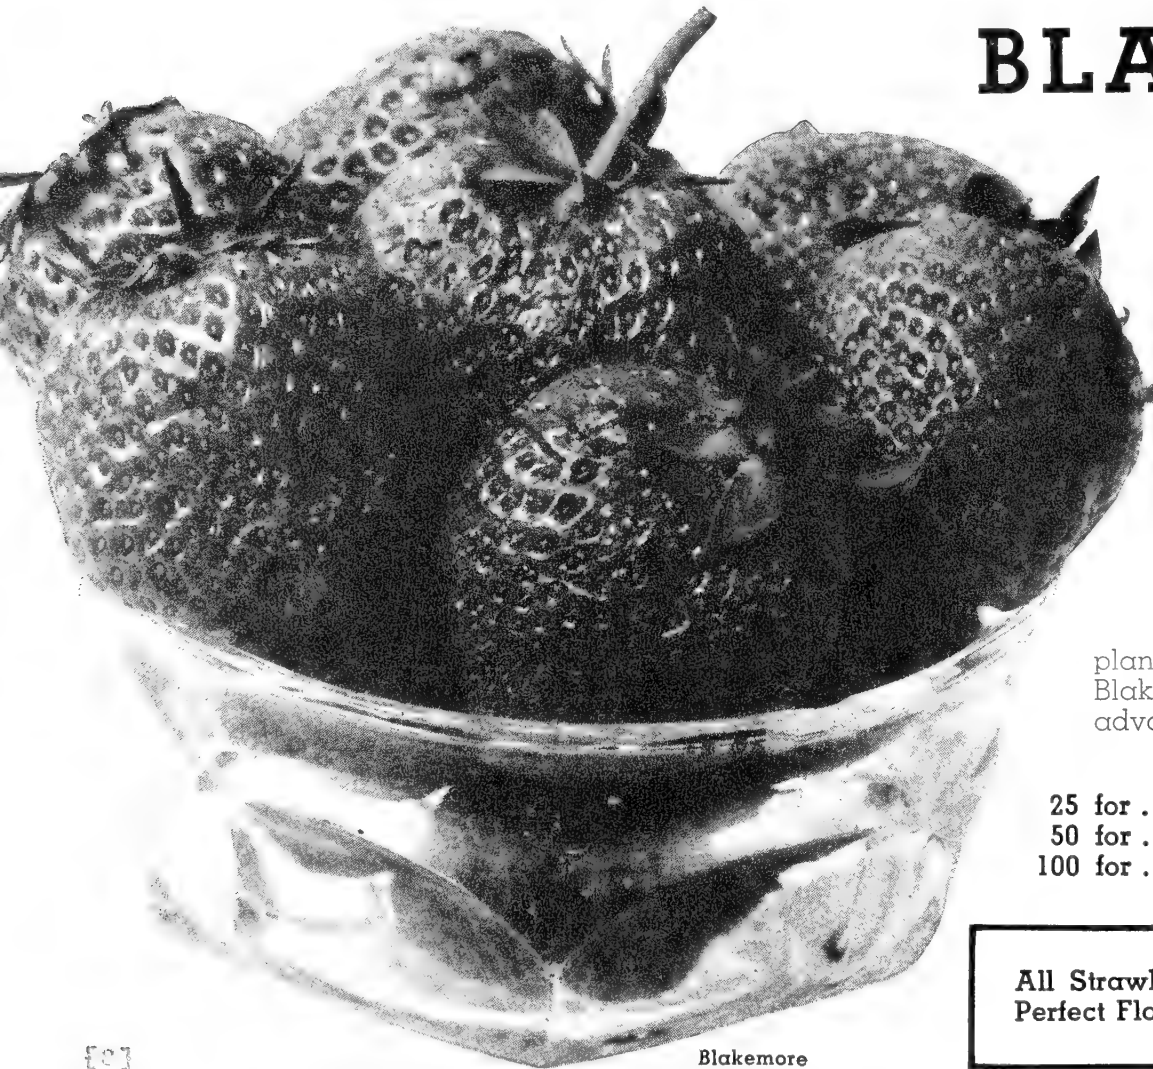

CATSKILL THE SUGAR FLAVORED STRAWBERRY

It is now generally recognized as one of the best of the midseason to late varieties. This popularity is due to the fact that it will produce more quarts of large berries than any other variety. It is a sure cropper, as it ranks next to Premier in this respect. It rarely ever freezes. Catskill is bright shiny red, the berries hold their color very well, and when they are carefully packed it presents a very attractive appearance. The foliage of the plant is rich, waxy in appearance, and the fruit is pro-

duced on long picking stems. It ripens when the market is almost bare of fruit, and for this reason always commands a good price.

PRICES

25 for	\$1.10	250 for	\$ 6.10
50 for	1.90	500 for	8.95
100 for	2.85	1000 for	17.00

Blakemore

BLAKEMORE

"YELLOW'S FREE"

Great Shipping Berry

The Blakemore is by far the best early shipping berry the South ever had. Stands a lot of abuse and neglect in growing, more than any other variety we know of. Produces enormous amount of fruit of fine quality, and will produce this fruit on land where common varieties would be a failure. Desired by canners and cold-pack men. Every Blakemore plant we offer is of the "Yellows-Free" strain. These plants will outbear the common run of Blakemore, and growers should take advantage of this fact.

PRICES

THE WORLD'S GREATEST STRAWBERRY

Scarlet Beauty will produce more huge, first-class berries than any variety we have ever seen. It has healthy foliage, is an excellent plant maker, and a great producer. This makes Scarlet Beauty the best today.

You Can Tell the Worthiness of Any Variety by Its Popularity

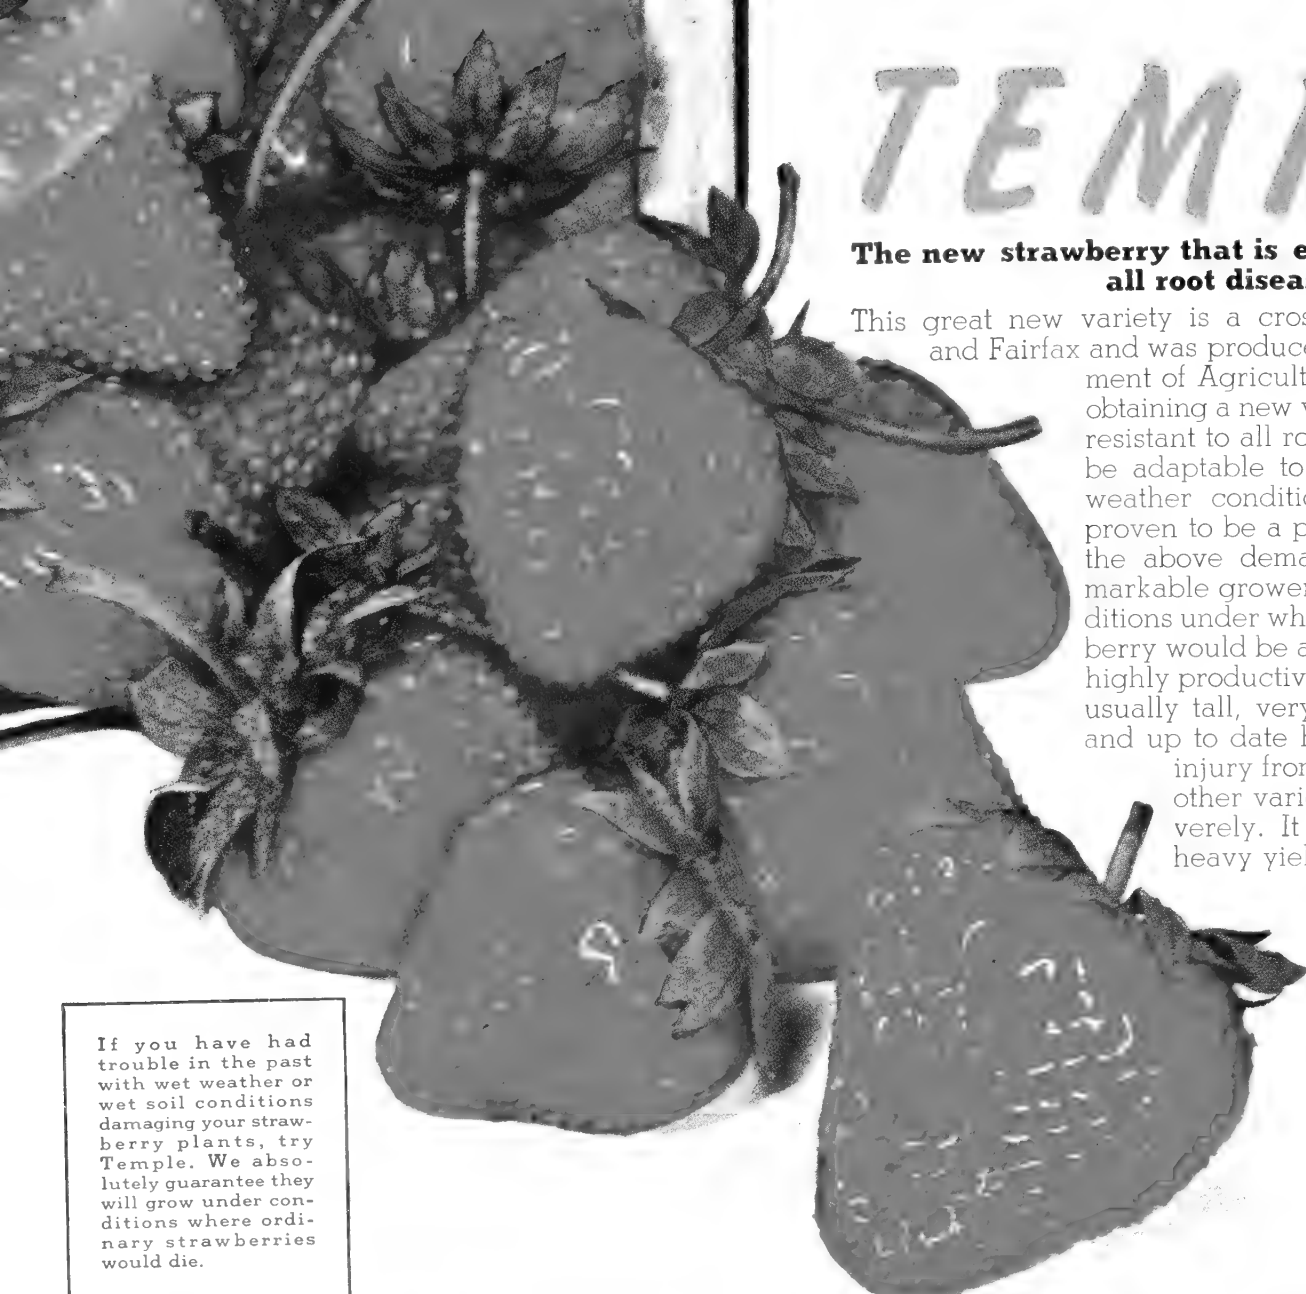

This variety has in the past three years gradually increased in popularity to such an extent that it is selling almost as well as Premier. This shows us that Scarlet Beauty is doing a good job and that the variety is doing just what we said it would do. It produces outstanding berries of large size at a time when the market is bare of other varieties.

Huge Size, Bright Color

Scarlet Beauty produces fruit of extremely large size that is slightly round with a very bright green calyx. The fruit is extremely bright and showy. Stands shipment well as the fruit is solid clear through.

Good Grower and Late Fruiting Season

Scarlet Beauty is a perfect flowering variety which requires no pollinizing. It is the only semi-late berry that will produce as many or more quarts per acre as the Premier. It begins to ripen soon after Premier and continues to produce large size fruit until the season ends. The plant itself is rather small, but is exceptionally long rooted. Produces a fine picking row on soil where some varieties would be a failure. 100 plants should be in every garden in the U. S. We think so much of this variety that we will replace free of charge any plants you buy of this variety, if you are not entirely satisfied after you have fruited them one year.

TEMPLE

The new strawberry that is entirely resistant to all root diseases

This great new variety is a cross between Aberdeen and Fairfax and was produced by the U. S. Department of Agriculture for the purpose of obtaining a new variety which would be resistant to all root diseases and would be adaptable to low ground and wet weather conditions. This variety has proven to be a perfect answer to all of the above demands. It is a very remarkable grower and will survive conditions under which the ordinary strawberry would be a total failure. It is very highly productive. The plants grow unusually tall, very resistant to leaf spot and up to date have shown very little injury from frost and cold where other varieties have suffered severely. It is a good shipper, a heavy yielder, and ripens about

the same time as premier and Dorsett. The berries are large, light red, and have a brilliant calyx which presents a fine appearance when picked.

If you have had trouble in the past with wet weather or wet soil conditions damaging your strawberry plants, try Temple. We absolutely guarantee they will grow under conditions where ordinary strawberries would die.

MORRISON *Black Raspberry*

THE GIANT NEW BLACK RASPBERRY

This is one of the latest and newest black raspberry plants. It originated as a chance seedling in northern Ohio and has attracted a great deal of attention by commercial growers because of its abnormal size. The plant is an extra strong grower being quite free from the common black raspberry diseases. It ripens somewhat later than Cumberland and has a very dark glossy color. The berries are firm in texture and high in quality. Because of its large size and heavy bearing qualities we believe that the Morrison will probably produce more fruit per acre than any other black raspberry today. The plants are not plentiful and the price is somewhat higher than is commonly asked for the old varieties. However, we believe a trial planting will convince you that they are well worth the additional cost.

Stahelin's BLACK RASPBERRIES

CUMBERLAND KING OF THE BLACKCAPS

Most popular black raspberry today because of its great size, beauty, its firmness and productiveness. The fruit is the largest of the black raspberry family, often measuring practically an inch in diameter. Cumberland is very hardy, and will stand many degrees below zero without injury. It sets a great many berries, and should be heavily trimmed to get best results. Is a wonderful canning berry, makes delicious pies and jelly. Commands top market prices for black raspberries. Is almost disease free, and very popular because of this quality. Stands severe drought and cold weather conditions well, and is able to grow on almost any soil that is not wet.

1000 for	39.50		

LOGAN EARLY SWEET BLACK RASPBERRY

An Ohio origination. Logan ripens 7 to 10 days ahead of Cumberland, which allows the grower to get on the market ahead of other varieties, giving him an opportunity to make some real money. Produces immense crops of jet black berries, as large as Cumberland. Does not crumble, and the last picking looks as nice as the first. Stands severe weather conditions. A great deal of its present popularity is due to its "disease-free qualities."

Cumberland

You'll have berries this year from Stahelin's 2 yr. bearing age plants

As a great many of our customers desire quick results in their garden, we have produced a few thousand of these large size black raspberry plants to supply this demand. These black raspberry plants are very large. They will run from 18 to 24 inches in height. They will all be branched and they will have a mass of heavy roots. If you plant them carefully everyone of them will live and will produce a partial crop for you the first year. A great many commercial growers are planting this type of plant as it assures them of getting a full crop in two years, whereas the one year plants must be grown three years in the field before they will bear to any extent. We suggest to those that order these two year plants that they cut them back to some extent and not allow them to bear fully the first year.

Stahelin's RED RASPBERRIES

LATHAM THE FAMOUS LATE RED RASPBERRY

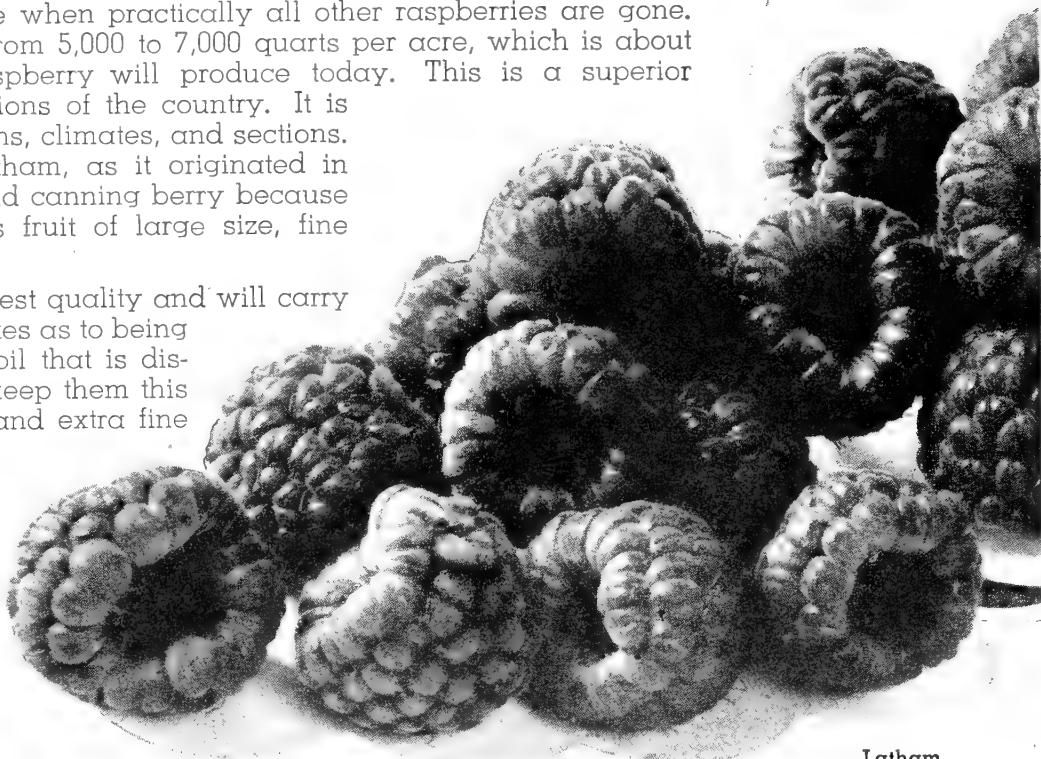

The Latham is a big, late ripening, red raspberry that grows on a very stiff cane and comes on the market at a time when practically all other raspberries are gone. It is very productive; will produce from 5,000 to 7,000 quarts per acre, which is about twice as much as any other red raspberry will produce today. This is a superior variety which does well in all sections of the country. It is adaptable to all sorts of soil conditions, climates, and sections. Cold weather has no effect on Latham, as it originated in Minnesota. It is a great shipping and canning berry because of its wonderful qualities. Produces fruit of large size, fine color and good flavor.

The plants that we offer are of the best quality and will carry double and triple inspection certificates as to being free from disease. Plant them on soil that is disease free and you can continue to keep them this way. Our No. 1 plants are heavy and extra fine selected stock not to be compared with the ordinary run of plants sometimes offered.

Latham

SUNRISE THE FINEST EARLY RASPBERRY TODAY

A comparatively new early red raspberry, which we recommend very highly. It starts to ripen in Michigan the latter part of June, about two weeks ahead of Latham, and because of its habit of sending up long shoots from the bottom of the cane which ripen later than the buds at the top, it has an extremely long picking season. Is about the size of Latham, and is a bright red when ripening. Fine textured, juicy; does not crumble, and very firm. Does not require expert attention to grow. Plants are vigorous and bear heavily. Sunrise is easy to pick, easy to sell, easy to grow and to eat.

PRICES—1 Yr. No. 1 Plants

WASHINGTON

This is an entirely new red raspberry that originated in the state of Washington where red raspberries have proven to be a very profitable venture. It is a real addition to the commercial red raspberry growers list of fine varieties. It is quite resistant to disease, is very hardy, and the fruit is of excellent quality with a very fine flavor. This variety has one peculiarity in regard to its bearing habits. It bears over an unusually long period. Then shortly after the main crop has been harvested the young canes will start to bloom and put on another crop during the early fall. The fruit has a remarkable bright red color and the all around excellence of this berry should cause it to be tried by a great many of our raspberry growers.

Stahelin's Pedigreed ASPARAGUS

New PARADISE

The New Giant Strain of asparagus. It will produce a crop one or two years sooner than will any other known variety today. It is rust resistant, producing stalks of immense size and wonderful appearance. Is easy to grow, and once planted will last from 12 to 15 years with very little care. Paradise is the first asparagus to produce in the spring, and this crop is harvested early when you do not need to be bothered with other things on the farm.

Money-Maker

Paradise asparagus offers you a great opportunity to make money. These fine large rooted plants, produced from expensive pedigreed seed, enables you to buy the world's finest at a cost no higher than for common stock. Grown on special sandy soil, fertilized and dug with special machinery to get the whole root system, we offer you a premium plant at a reasonable cost. Paradise asparagus does not require any special care. We have complete culture on asparagus, ask for it when ordering. **Priced Below.**

MARY WASHINGTON

The pedigreed seed that we use produces specimen stock often more than an inch in diameter. It is very crisp and delicious. Wonderful for canning. The heads of Mary Washington are very solid and compact; thus, always commanding a better price than asparagus that has loose heads. This variety is absolutely rust resistant. Grows very fast and comes up exceedingly thick in the row, producing a very heavy crop. Approximately 5,000 plants are required to set an acre. Once planted they last for years, requiring little care. Starts to bear in Michigan in May and continues for about two full months. **Priced Below.**

Stahelin's Selected

NORTHERN GROWN

PERFECT HALE

A perfect flowering yellow variety. The Perfect Hale will ripen a few days after you have picked your Elberta peaches. This will lengthen your picking season a great deal.

Money-Maker

It is of the Elberta type, although it is nearly round in shape. It has the rich "Hale" flavor, but its quality is about like Elberta, although it is more highly colored. Flesh is exceptionally firm, and richly flavored. Freestone. Perfect Hale has proved to be one of the best in hardiness, and it produces a full crop of good size perfect fruit every year under extreme conditions, such as drought, etc. **Priced below.**

Perfect Hale

NO STORAGE STOCK

When you order trees from us you are assured of getting stock that is fresh, and on which the bark will be firm and not shriveled. These fresh trees are far superior to those that are kept in inside storage over winter. Our trees are subject to the coldest of weather all winter outside, and have no protection.

J. H. HALE

Is extra large in size, round in shape, with a yellow flesh and deeply flushed cheeks. Is highly prized as a canning variety due to its red center. Freestone and semi-fertile. Should be planted with Rochester or South Haven for pollinizing purposes. **Priced below.**

PRICES—PERFECT HALE AND J. H. HALE

RED HALE

The Red Hale peach is a bud sport of the old and commonly known "Hale" variety. We can best describe this peach by comparing it to the Delicious apple. The new Red Delicious apple has the color where the old Delicious doesn't have it, and the new Red Hale peach has the same characteristic. It simply has more color than the old common variety. It is enormous in size, has excellent shipping qualities, and its all red color is making this new strain of the Hale variety an excellent peach to plant where you can pollinize with varieties like South Haven or Hale Haven. It is not a fertile flowering variety and should always be planted with another variety for best results. **Priced below.**

The Finest That Money Can Buy **PEACH TREES**

AMBER GEM

THE FROST-PROOF PEACH

A peach that is huge in size, extremely bright red in color tinged with yellow, and a clingstone variety. The tree is thrifty, bears an enormous crop, and is a wonderful peach for canning. Extremely heavy skinned, and the finest shipping peach that we have. Very hardy. **Priced below.**

Amber
Gem

NUGGETT

This new clingstone peach has never been offered before. We have watched it in our orchard for the past seven years and it is distinctly a beauty. It is clingstone until dead ripe and then it will come off the pit. Of brilliant golden yellow color with a slightly red cheek occasionally. It has a marvelous flavor and ripens from 7 to 10 days after Elberta. Especially hardy. This variety has produced a crop when all other varieties were winter-killed. Plant 2 to 6 for home use and you will never regret it. Nuggett the better peach. **Priced below.**

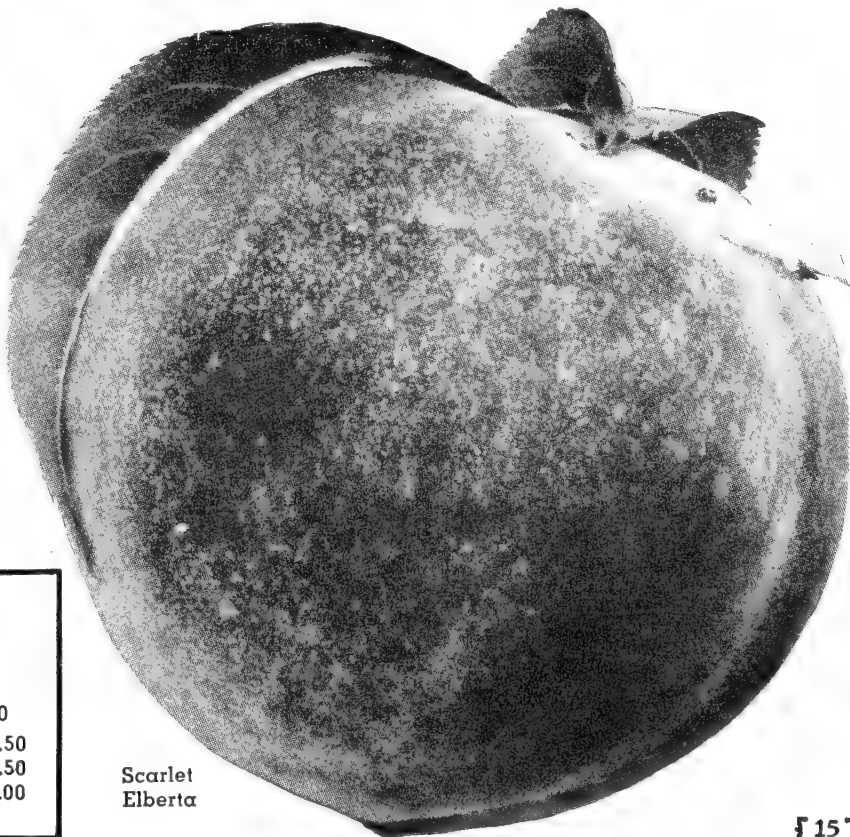

Elberta

ELBERTA

No other peach has ever attained the popularity of this variety. Roundish oval in shape, golden yellow skin with a slightly red blush on the cheek. It is very thickly skinned, which gives it its shipping qualities. Is a yellow freestone, and self-pollinizer. Trees are quite hardy, although they will not stand frost conditions as well as some other sorts. Enormous producer. **Priced below.**

SCARLET ELBERTA

Ripens a few days earlier than common Elberta, somewhat larger in size, and absolutely hardy. Uniformly yellow fleshed, and its color is blazing bright red. Tree is vigorous, strong growing, and bears young. Sets a heavy crop, but does not requiring thinning. **Priced below.**

Careful Bud Selection & Years of Growing

Rochester

Early
Elberta

ROCHESTER

A rich flavored, round, orange colored, extra early peach. Its popularity has gained yearly due to the fact that it is a very hardy variety. Is an excellent canner and shipper. The peach is orange-yellow with blazing cheeks, and has a wonderful flavor. It is a fine pollinizer. Should be thinned for best results. Freestone. **Priced below.**

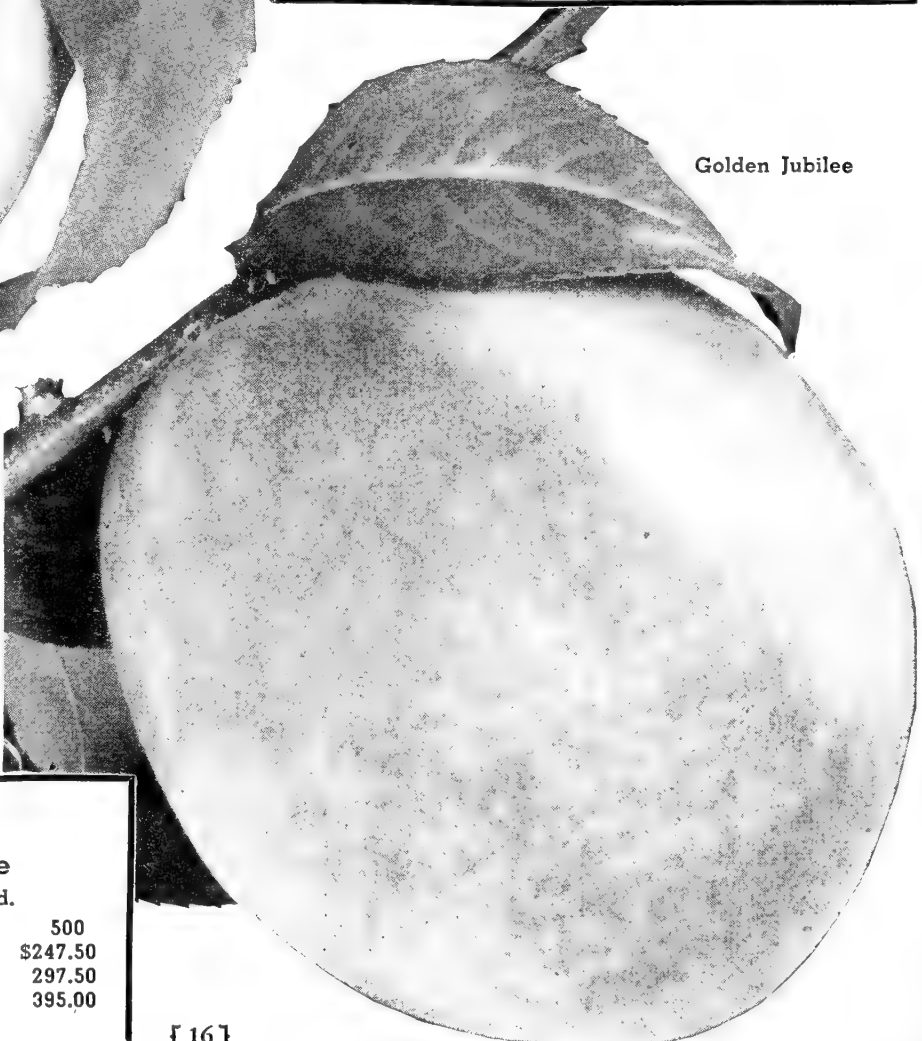

Sullivan's

EARLY ELBERTA

Sullivan's Early Elberta is the new type Elberta peach that is sweeping the peach growing section of the country. The tree is very hardy and it is rapidly replacing the old standard Elberta peach wherever it has been tried, chiefly because of its ripening season which is far ahead of the ordinary Elberta. Ripens 7 to 10 days before Elberta, identical in shape, color, flavor, but is slightly larger in size. Excellent shipper. **Priced below.**

PEACH SALE 18 to 30 in. Size

We have a limited number of peach trees that are from 18 to 30 inches in height. These consist of the standard varieties as follows: Elberta, Sullivan's Early Elberta, Hale Haven, Redhaven, Kalhaven, Perfect Hale, J. H. Hale, Scarlet Elberta, Amber Gem, and White Hale. Price in lots of 100 only for \$35.00, 500 for \$149.00. Price Net, No Discount.

Golden Jubilee

GOLDEN JUBILEE

Somewhat oblong in shape, and has a brilliant golden color with a slight red cheek on one side. Is golden fleshed, very juicy, and a freestone. Perfect pollinizer and the tree is extremely hardy, producing fruit when other trees will be frozen. **Priced below.**

Experience Produce *Stahelin's* Sturdy Fruit Trees

KALHAVEN

A Michigan peach which is a result of a cross between the J. H. Hale and the old Kalamazoo variety. Immense in size; its color and flavor is excellent. Very hardy. It is large, round in shape, is a beautiful red color all over, and is an extremely good shipper. Ripens a few days after the common Elberta. The tree is hardy, makes an excellent growth, and is a self-pollinizer. Freestone. **Priced below.**

REDHAVEN

EXTRA EARLY RIPENING. The Redhaven peach is a Michigan origination which makes it especially hardy. This peach is gaining popularity and it is being very widely planted because of its extreme high red color. It is one of the earliest, if not the earliest, peach that we have and it carries a very high color long before it ripens so that you can pick it at almost any time that you desire. It is an excellent shipper. The fruit is very firm and easy to handle and it has a brilliant golden, firm textured flesh. It is freestone and self-pollinizing. **Priced below.**

HALE HAVEN

Colors all red long before it is ripe, and retains its richness of flavor over a long period. Is round in shape, very sweet flavor, and ripens about a week before Elberta. Freestone. Is one of the greatest shipping and canning peaches introduced. **Priced below.**

Kalhaven

RED ROCKET

The New Red Peach

We are presenting to our customers an opportunity to buy the newest in the yellow freestone peach—the Red Rocket—a better peach, and ripening at a time when the market is always good.

Red Rocket has a brilliant yellow skin with a tremendous amount of red coloring when fully ripe, almost black. The flesh is firm and of an extremely fine texture. The trees on test have been excellent bearers, and the peach is outstanding for canning and shipping purposes.

Ripens after Hale Haven

Red Rocket is 10% larger than Hale Haven, and ripens about 4 to 6 days after same, and about 6 days before Elberta. The ripening time has not been proven exactly, due to the newness of the peach. It is a distinct bud sport of the Fertile Hale. The one branch on the parent tree shows all red and ripens when the balance of the trees are grass green. It is a quality that cannot be bettered, and shows more color than needed. Its size is large, it is distinctly a new variety, trademarked by us, and obtained only from Stahelin. It is one peach that will not dryrot to any extent.

Red Haven

4 New Peaches of Exceptional Merit

Illustrations In Full Color On Pages 20 and 21

NEW *Michigold* PEACH

A huge yellow freestone peach which we introduced several years ago. Michigold is a semi-early peach of immense size and extremely high color. Absolutely round in shape and for this reason we think it has Hale parentage. A perfect pollinizer. Absolutely hardy and an excellent shipper. While it has a very tough skin, the flesh is golden yellow and very sweet. As a commercial grower of peaches we have found that our new Michigold peach is a variety that will make you more money than Hale Haven, South Haven, or Redhaven, and we think it should replace these varieties. The tree grows somewhat in the manner of the willow. That is, the branches droop considerably when the tree is young. It is very thrifty, exceptionally hardy, and has produced a crop of peaches when other varieties were badly injured by extreme cold which sometimes happens in Michigan. **Priced Below.**

TRADE MARK *Hon-ee-gold* (HONEYGOLD)

This is the new peach which one of our customers named for us. A native of Michigan and a proven variety that has all of the good points and none of the bad.

Large Size and Excellent Flavor

The Hon-ee-gold peach is a marvel in size, being slightly on the round type, 10% larger than Elberta, and ripens very late on the tree. Has a beautiful red cheek and packs up beautifully in the bushel. Hon-ee-gold has an excellent flavor, being golden yellow inside with a slight amount of red next to the pit. Somewhat on the dry side, which helps its shipping qualities.

Shipping Qualities

In our tests this peach simply does not rot, but dehydrates and virtually dries up before rotting. Skin texture is heavy like Elberta, thus making an excellent peach for shipping.

Hardy Trees

Hon-ee-gold is a very thrifty upright growing tree. It has never winterkilled or shown any winter injury whatsoever here. It has everything a real peach needs. Freestone. **Priced Below.**

Fairhaven

A New Michigan Dept. of Agriculture Creation

Fairhaven originated at South Haven, and is a cross between J. H. Hale and South Haven made in 1930, and this cross has been on continuous research since that time. The season of maturity is a week before Hale Haven.

The Fairhaven tree has shown no sign of weakness, and is a very vigorous and productive tree. The production record of this variety has been remarkably good. It resists cold to a great degree. The fruit is of a very large size, but occasionally it has a tendency to fruit heavily such as Hale Haven and Redhaven. It is practically round, of a golden bright color, with an accentuated red cheek. It resists browning which is a very great advantage to you who may have freezing units in your own home. It is an absolute freestone. Our buds came direct from the Experimental Station at South Haven, and we offer you trees of the best quality, true to name. **Priced Below.**

We have budded for fall 1949 and spring 1950 an exceptionally large quantity of Fairhaven peaches. We will be glad to contract or quote prices to the commercial growers who are interested in buying this variety in large lots for future delivery. Write us for our plan regarding same.

11/16 in., 5 ft. and up	1.85	8.50	16.45	34.50	130.00

WHITE HALE THE GIANT WHITE PEACH

The White Hale is a peach of our own introduction, and comes from a bud sport found on a branch of seedling white peach tree grown and produced on our own farm. It is extremely hardy as it has produced a crop of fruit every year since we introduced it in this section. When other varieties are badly frozen the White Hale will produce a normal crop of fruit. The flavor of this peach simply cannot be described. It is honey sweet in flavor and is immensely large in size. It has fair shipping qualities and if you have a roadside trade or a nearby market, this variety will make you a lot of money. Every home should have a White Hale peach tree. Freestone. **Priced Below.**

NECTARINE (Fuzzless Peach)

One of the most delicious of all fruits. Smooth skin like a plum. Has a rich flavor, juicy, and highly prized as a dessert fruit. Nectarines are as hardy as the peach and require the same culture. Fruit is a bright golden color with slightly red cheek. Tree is vigorous and bears young. **Prices: Medium size trees, \$1.95 each; 3 for \$5.40.**

Nectarine

Canada Red RHUBARB

The Canada Red Rhubarb which we list is of the Chipman strain which is regarded as the finest obtainable today. The Chipman is large in size, very plump, and red throughout the entire stalk. It quickly forms large clumps. From 3 to 6 plants will furnish enough rhubarb for the entire family the year round. Very hardy and especially desirable for market growers.

PRICE: Each 45c:
10 for \$3.50.

See page 13 for
further prices.

New RED LEAF PEACH

BRILLIANT RED FOLIAGE ALL YEAR

We offer this brilliant new red leaf shrub as something entirely new in the ornamental field. This new shrub is not only a brilliant ornament, but it produces worthwhile fruit at the same time. The fruit from this tree is white, medium size, and very highly flavored, making it especially desirable for pickling. Its habits of growth are practically identical with the common peach and its deep rose color blossoms against the red foliage produces a very pleasing picture when set among other plantings.

PRICE: 1 yr., 3½-5 ft.
trees, \$1.50 each; 2 for
\$2.50; 10 for \$11.50.

5 IN 1 APPLE TREE

"The City-man's Orchard"

The quintuplet apple is a tree that has been produced so that the small home owner who has a restricted planting space can have a variety of apples over a long picking season. These trees will grow just as large as the ordinary varieties,

but we have budded some of the best kinds so that you will have a Double-Red Delicious, Jonathan, Stayman's Winesap, Yellow Transparent, and Wealthy. These are five of the best varieties and they will bear fruit over a long period of time. Not only is this tree good investment from the standpoint of getting fruit, but it presents a beautiful appearance when in full bloom. The different varieties will bloom at different times and they can be used for ornamental purposes if desired. We have lowered the price considerable which will enable you to plant this tree at a lower price than ever before. **PRICE:** 9/16 trees, \$1.95 each; 3 for \$5.25.

Stahelin's Heavy Rooted Disease-free Peach Trees will Make Money Fast

Hon-ee-gold

HON-EE-GOLD

The Hon-ee-gold peach, which is a Stahelin origination, comes from central Michigan and in our estimation is one of the best late peaches that has ever been offered to the public.

Brilliant Golden Color, Excellent Flavor

It ripens from a week to ten days after Elberta and has a brilliant golden color and is slightly on the round type with a beautiful red cheek. In size it compares with the very largest of Elbertas. This makes a wonderful appearance when they are packed ready for market. Where it has been sold its flavor has been a strong selling point. Recommended as a companion tree to all Elberta plantings. Freestone.

PRICE: 9/16 trees, \$1.55 each; 10 for \$14.50.

Complete schedule of prices on page 18.

FAIRHAVEN

The production record of the Fairhaven peach has been remarkable. This is a variety which so many of our customers have inquired about the last two years. Now we have a supply.

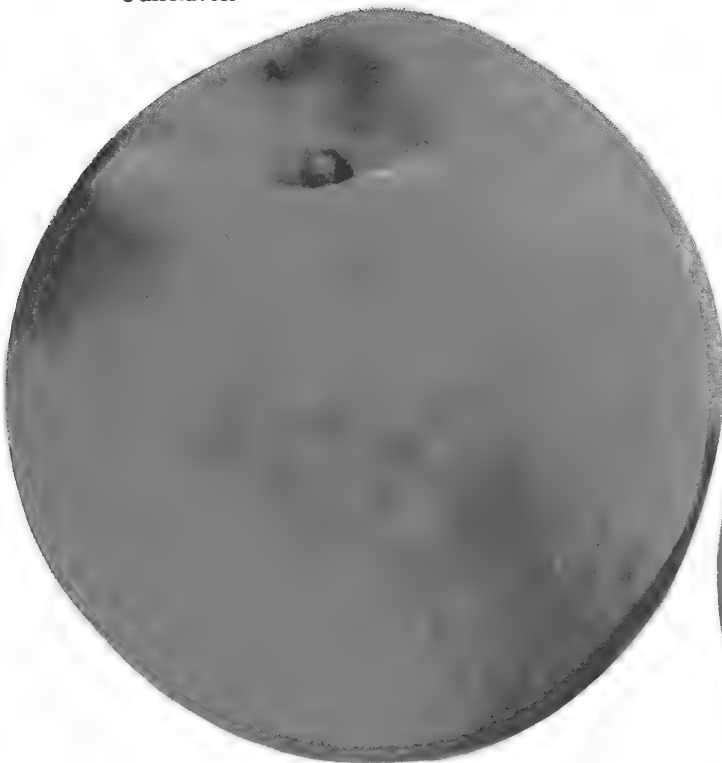

Hardy and Attractive Color

It is very hardy and during the seasons when the blossoming period is cold or foggy it will produce a full crop of fruit when many other varieties are unproductive. It is nearly round, mostly bright golden color with an attractive red cheek. This color shows up when the fruit is still very green. It is an excellent shipper. The season of maturity is about a week before Hale Haven and right at the end of the Redhaven season. Freestone.

PRICE: 9/16 trees, \$1.55 each; 10 for \$14.50.

Complete schedule of prices on page 18.

Fairhaven

MICHIGAN ORIGINATIONS

The four varieties of peaches listed on this page are all peaches which have originated in Michigan. This makes for hardiness, and to you who are located in sections where hardiness is a desirable quality we especially recommend these four varieties for you to plant.

WHITE HALE

White peaches are not generally regarded as sorts which are to be planted for market purposes, but owing to the unequalled quality and the extreme size of White Hale, we think it should be more heavily planted for commercial purposes. This white peach originated on our own farm and is the best white variety we have ever seen.

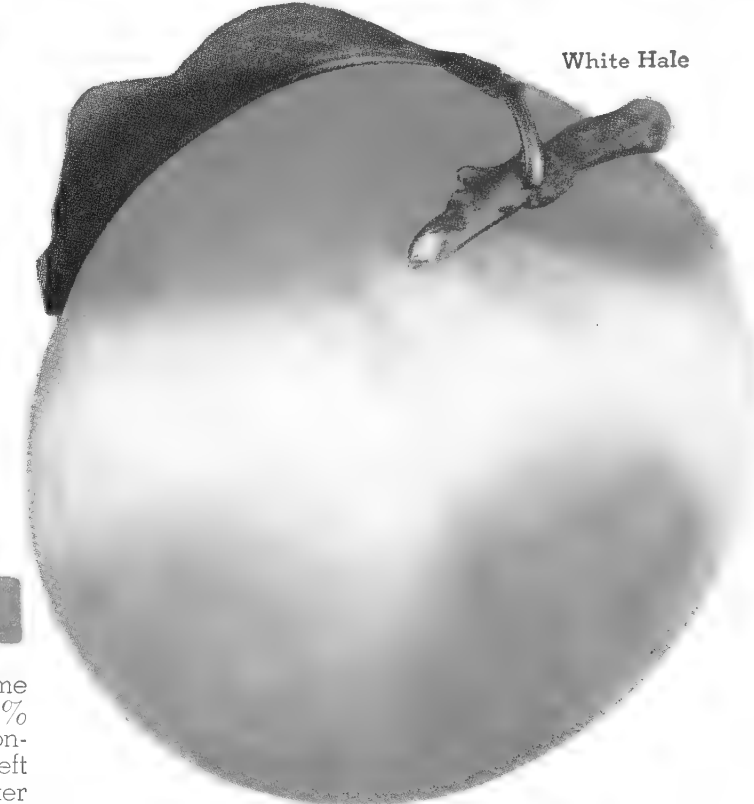

Hardy, Remarkable Flavor

It is exceptionally hardy and has produced a crop of fruit practically every year since it was introduced. The flavor of the peach is remarkable. It is honey sweet in flavor and of very high quality. If you have a roadside trade these peaches will bring you a premium over common varieties. Freestone.

PRICE: 9/16 trees, \$1.55 each; 10 for \$14.50.

Complete schedule of prices on page 18.

White Hale

MICHIGOLD

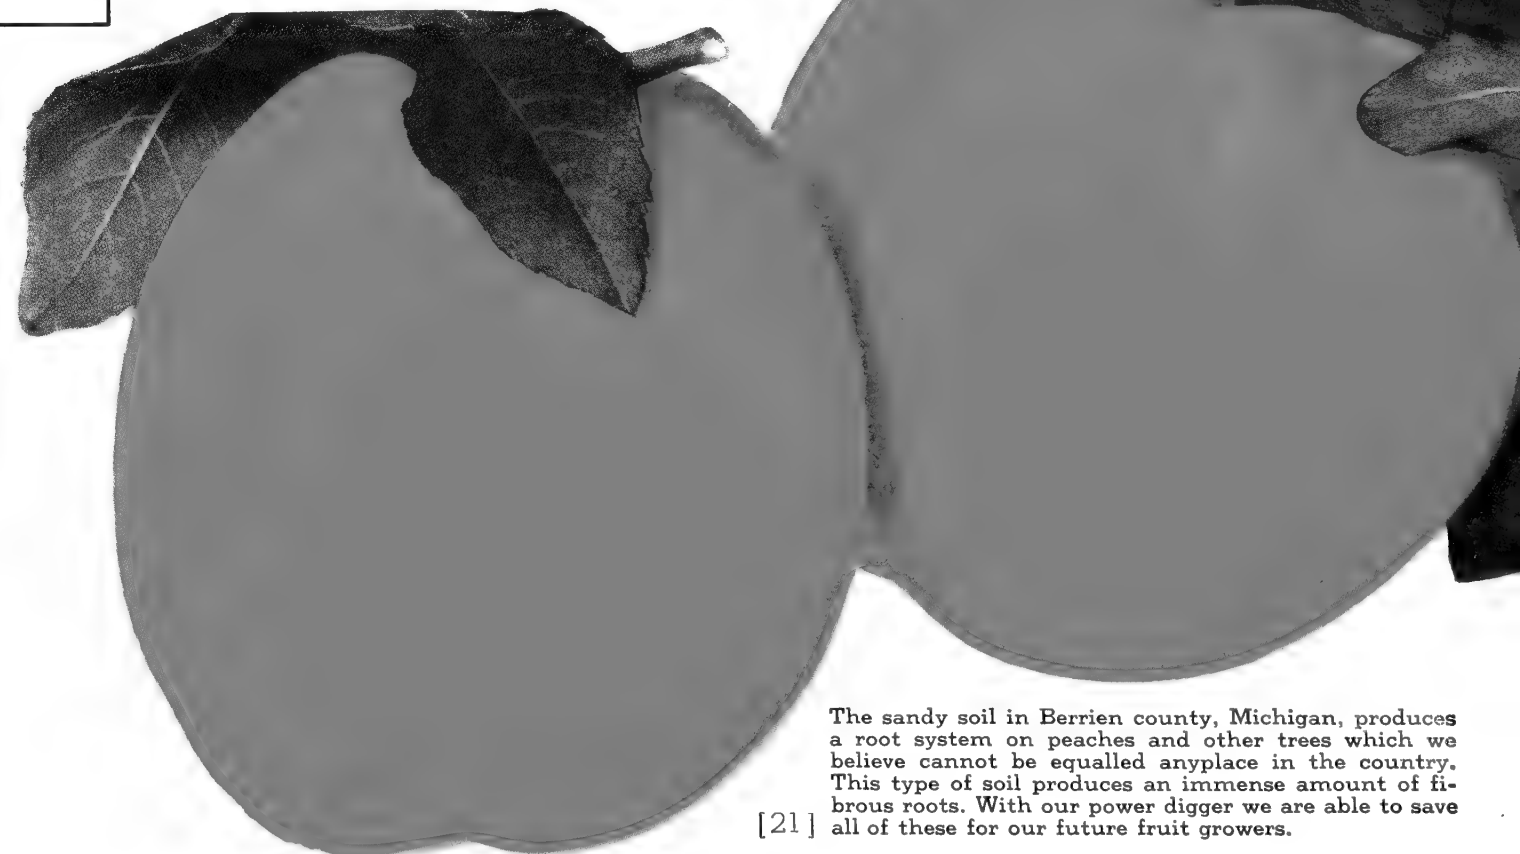

Large Size, Brilliant Color

It is a variety which ripens about the same season as Hale Haven, but is fully 10 to 15% larger. It is a brilliant golden color with a considerable amount of red color and if it is left to fully ripen it will run 50% red. It is a better quality peach than either Hale Haven, South Haven, or Redhaven, and its size will always make it bring a premium. Self pollinizing. A free stone. Tree is hardy and stands extreme cold weather. As we have reduced the price in large quantities it should be planted more heavily by commercial growers.

PRICE: 9/16 trees, \$1.55 each; 10 for \$14.50.

Complete schedule of prices on page 18.

Michigold

Due to the fact that we have increased our budding of the varieties on this page we are in a position to furnish them in large quantities to the wholesale grower. We recommend these four varieties as being superior to practically all other varieties of peaches and we will be pleased to quote commercial prices to those who wish to plant 300 or more trees of each variety.

The sandy soil in Berrien county, Michigan, produces a root system on peaches and other trees which we believe cannot be equalled anyplace in the country. This type of soil produces an immense amount of fibrous roots. With our power digger we are able to save all of these for our future fruit growers.

MONTMORENCY CHERRY

Most Satisfactory - Most Profitable

We have been very much pleased with the results our sour cherry trees have produced among the largest commercial growers in the country. Being located in Berrien County, Michigan, we can produce the finest rooted cherry trees in the United States. For this reason the commercial growers in the cherry sections of Michigan and Wisconsin are coming here for their source of Montmorency trees. We are budding only the very finest strain of the large Montmorency and our trees are certified by the state. Our cold weather coupled with an extremely long growing season produces a hardy tree and one which is ready

to start producing for you as soon as received.

Montmorency is the most satisfactory and most profitable sour cherry tree you can plant. It is the only variety that is planted commercially. It ripens midseason to late and has remarkable keeping qualities after it is ripe. It is preferred 100% by the canners and pie makers. Self pollinizing and very hardy.

★ Starglow ★ APRICOT

A VERY HARDY APRICOT, ORIGINATING IN MICHIGAN

This marvelous new apricot originated in central Michigan and is of very large size, brilliant yellow color, marvelous flavor, and absolutely freestone. This new variety should be planted in every backyard where apricots are desired. The fact that this apricot is a seedling which came up in Michigan should make it especially hardy and late flowering, a very desirable feature in all apricots. Starglow apricots will produce a crop where most of the other apricots will fail. Self pollinizing.

PRICE: 7/16 trees, 3-4 ft., \$2.20 each; 3 for \$5.95
9/16 trees, 4½ ft. and up, \$2.65 each; 3 for \$7.80

Schmidt's
Bigarreau

Sweet Cherries

The sweet cherry requires especially high dry soil for successful growing. If you do not have this soil don't waste your time in planting these trees. They should be planted about 25 ft. square and no trimming should be done on them the first two years.

We produce some of the finest sweet cherry trees in the country. Our alluvial soil produces a very fibrous root system which is quite contrary to the general trend of sweet cherries in other districts where they have only a tap root. We suggest that you plant at least two trees, even if of the same variety, for cross pollination.

YELLOW SPANISH

A fine yellow cherry that when ripe is slightly darker than Napoleon, which it resembles a great deal. As a yellow cherry it is one of the best. Has slight red cheek when fully ripe. **Priced Above.**

WINDSOR

A large, dark red cherry. Flesh is quite firm, making it an excellent shipping variety. Fruit clings to the tree long after ripe. Trees are hardy, regular prolific bearers, and good pollinizers. **Priced Above.**

BLACK TARTARIAN

Very common black sweet cherry. The inside flesh is purple or darkish black, and is very sweet and juicy. Popular for eating, canning and shipping. Ripens early. **Priced Above.**

NAPOLEON

This is a choice yellow sweet cherry of highest quality. Large size, very firm, juicy and sweet. A very heavy producer of fruit with bright red cheeks. Sometimes known as Royal Anne or White Oxheart. **Priced Above.**

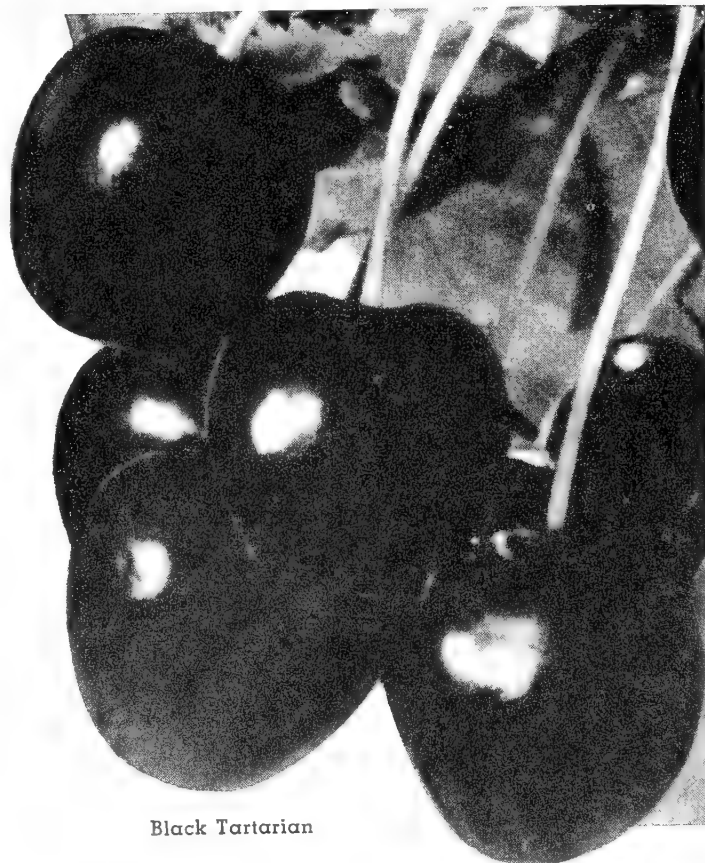

SCHMIDT'S BIGARREAU

A hardy strain of Bing, about the same size, and presents much the same appearance. Is a deep mahogany red in color; flesh is tender, juicy and fine flavored. Bears young, hardy, and a sure cropper. **Priced Above.**

Black Tartarian

EARLY RICHMOND SOUR CHERRY

A variety somewhat similar to Montmorency only it is slightly smaller in size. The trees grow identical, but the Early Richmond ripens a crop and is out of the way before the Montmorency starts to ripen. Self pollinizing. **Price:** 5/16 trees, 95c.

Additional prices listed under Montmorency on opposite page.

PLUM TREES

STANLEY PRUNE

The Stanley Prune plum is without a doubt the finest and most beautiful blue plum that we have today. It is very large, very rich in flavor, and it is hardy in all sections of the United States. It is deep blue in color with a golden yellow flesh and it is absolutely free-stone. The chief quality of Stanley Prune, other than its large size and beautiful color, is that it does not rot on the tree. **Priced below.**

MONARCH

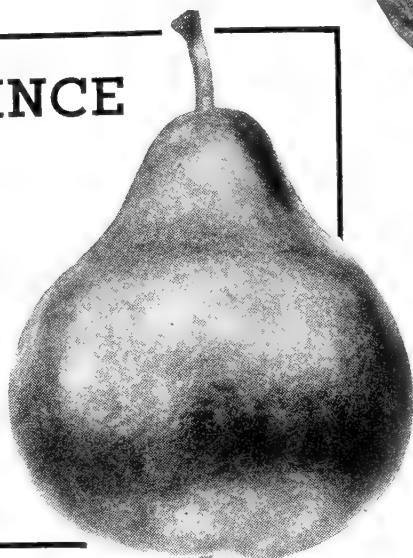

One of the best of the blue plums. It is absolutely round in shape, medium to large in size, and the trees are very hardy. The flesh of the plum is golden yellow; and hangs well to the tree. Excellent for canning. **Priced below.**

PLUM PRICES—ALL VARIETIES

ORANGE QUINCE

We list only one kind of Quince, which is the Orange variety. This is a dwarf growing tree which should be planted about 12 to 14 ft. apart. The foliage is very leathery, disease resistant, and quite dark in appearance. Orange Quince is hardy in practically all sections. The fruit is large like a good sized apple, golden yellow in color. This variety is valued very highly for preserving or jelly making. **Price:** 7/16 in., 3 ft. & up, \$1.65 each; 3 for \$4.50; 10 for \$12.50.

Goldbeck Perfection
Apricot

YELLOW EGG

A plum that is egg shaped, very large size, and extremely sweet. Prized very much for culinary purposes. Trees grow very large, vigorous, and very hardy. Ripens late August. **Priced below.**

BLUE DAMSON

The most popular of all preserving plums. Extremely high flavored. Turns a rich wine-red when preserved. Small fruit, dark blue in color, rich golden interior. Hardy, prolific, grows 10 to 12 feet high. Very heavy producer. **Priced below.**

Stanley Prune

BROWN TURKEY FIG

Pear shaped fruit of medium size with good quality white shading to pink flesh. Copper brown skin. Prolific and of the dwarf type. Very hardy.

PRICE: 18-24 in. trees, \$1.25 each; 2 for \$2.25.

EVERBEARING FIG

The Everbearing Fig as we have it is very well adapted to growing in the north. Will produce either in the field or in any container in which you may plant it. Produces the first year set out and heavily each year after. Is a good size, sweet, firm, and is an excellent fruit for preserving or eating fresh.

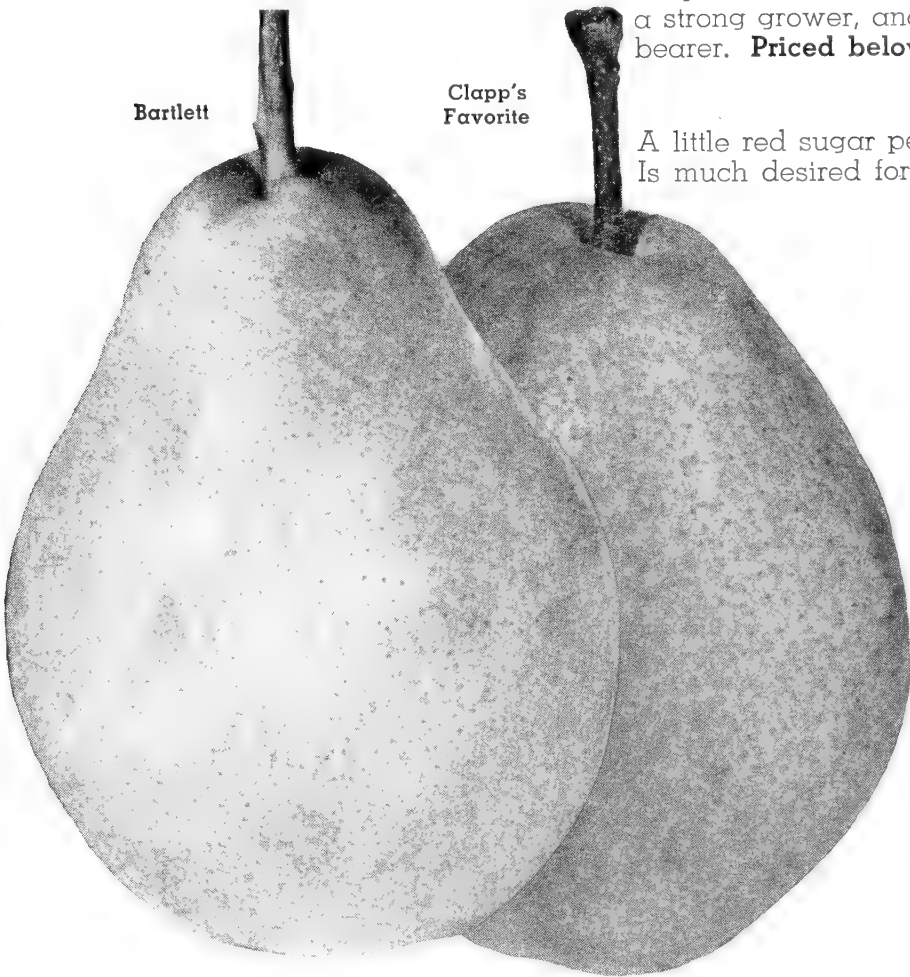

PRICE: 18-24 in. trees, \$1.25 each; 2 for \$2.25.

GOLDBECK PERFECTION APRICOT

A perfect variety in regards to vigor and hardiness. Very uniform in size, averaging about like a middle size peach; has a delicious flavor. A rich golden colored apricot-yellow, ripening evenly all over. Can be picked tree ripe for shipping. The finest apricot of today. **Prices:** 3-4 ft. trees, \$1.75 each; 3 for \$4.45; 10 for \$13.95.

CLAPP'S FAVORITE

Perhaps the largest of all pears, and always tops the market because of its excellent appearance. It is greenish yellow skinned with a dark red blush. Is quite juicy and sweet. Is a good shipper and the fruit ripens a few days after Bartlett. **Priced below.**

PEAR TREES

BARTLETT

The favorite commercial pear. Fruit is very large, juicy, orange-golden yellow in color with a soft blush. It is quite uniform in shape. Favorable for shipping, canning, and eating. The tree is a strong grower, and produces very young. Hardy, and a regular bearer. **Priced below.**

SECKEL

A little red sugar pear. It is richest, highest flavored pear known. Is much desired for pickling and canning purposes. Tree is very hardy. Ripens late September. **Priced below.**

LAWSON

Ever since we have listed the Lawson variety we have never been able to supply the demand. This pear, which is about the same size as Bartlett, ripens fifty days before Bartlett. It comes on the market when there are absolutely no other pears to be had. If picked properly it is very juicy and very rich in flavor. It is golden yellow with a brilliant red cheek. The tree grows to a very tall height and is quite free from blight. If you like pears and want an early variety, Lawson is the one that you should plant. **Priced below.**

DWARF PEAR TREES

We offer a few selected dwarf pear trees this year. These small dwarf trees can be grown in your back yard or anywhere that you are restricted for space. They are small at maturity, bear early, and produce the same high quality fruit as large size trees. Available in Bartlett, Lawson, Flemish Beauty, and Clapp's Favorite varieties. **Price: 2-3 ft., \$1.95 each; 3 for \$3.45; 5 for \$7.95. 3-4 ft., \$2.45 each; 3 for \$4.85; 5 for \$10.50.**

FLEMISH BEAUTY

A pear that is absolutely honey sweet in flavor when fully ripe. Is medium to large in size, pale yellow colored with a reddish brown cheek. Flesh is fine grained, juicy, rich and very sweet. Tree lives to a remarkably old age. **Priced below.**

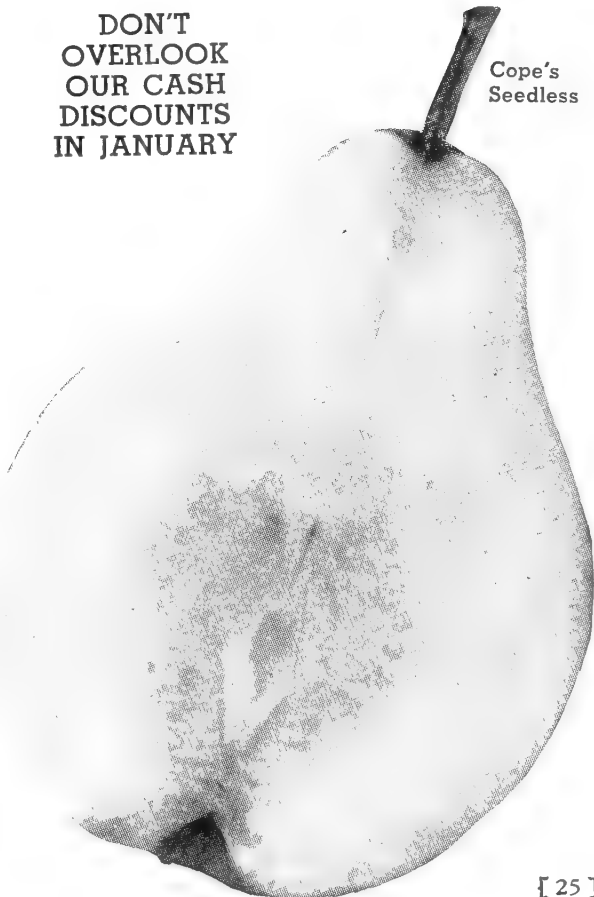

COPE'S SEEDLESS

A seedless variety when grown alone. Planted near other varieties it may cross pollinize and produce seeds. Ripens a few days after Bartlett. Superbly sweet and fine textured. Especially fine for canning and dessert purposes. Trees are thrifty, start bearing when about 3 years old. Yellow skin, slightly pinkish on cheek. **Priced below.**

BOSC

A popular pear in California due to its wonderful keeping qualities. A very long-neck pear which is used for boxing purposes, but is highly desirable because of its excellent flavor and shipping qualities. Tree bears young and is hardy. **Priced below.**

DOUBLE-RED DELICIOUS

This is the improved type of the common Delicious. The Double-Red, naturally colors up much more and much sooner than the old Delicious. The tree does well practically all over the United States. It is a wonderful size, is finely fleshed, juicy, and has a sort of sweet flavor with a slight acid taste. Excellent for eating and the most popular fruit for stand purposes. **PRICED ABOVE.**

SOLID-RED WINESAP

An improved strain of the old Stayman's Winesap, which gives you a great deal more color early in the season. It is large, round, cherry red, winter apple which is a wonderful keeper. Has a slight sweet acid flavor, and is very popular for eating or cooking purposes. Tree is very hardy and thrifty. **PRICED ABOVE.**

DWARF APPLES

The Gardener's Delight

The Dwarf Apple trees are only 10-15 ft. tall at maturity and can be planted 15 ft. apart. The fruit produced is the same as, or larger, than that produced on standard trees. Bear quickly—2 to 3 years after planting. Varieties available are Wealthy, Jonathan and Fameuse.

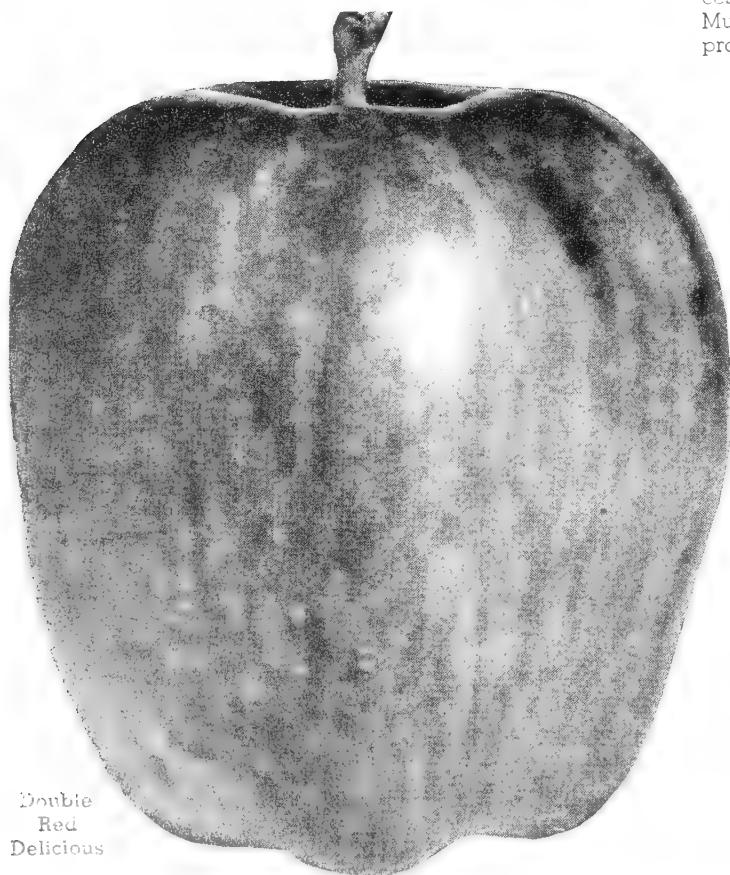

PRICE: 2 Yr., 2½ to 3 ft. trees, \$2.75 each; 3 for \$7.50.

GRIMES GOLDEN

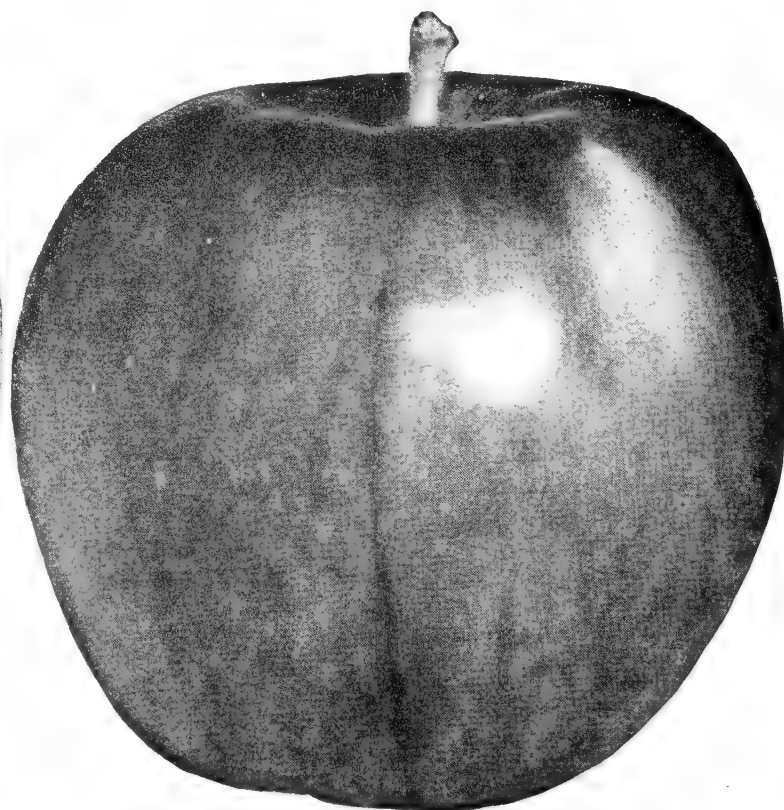

An all yellow apple. Round in shape, medium size, and the tree produces an enormous crop practically every year. It is quite acid in flavor, and is in much demand for canneries or cooking purposes. Quite hardy, and the tree is one of the best pollinizers that we know of. **PRICED ABOVE.**

WEALTHY

This is a variety that apparently does well all over the United States, and is one of the few kinds of apples that can be grown in the northwest successfully. It is a fall apple, medium in size, and has a very fine flavor. Much desired for cooking and pie making. The tree is quick bearing, very prolific, and extremely hardy. **PRICED ABOVE.**

RED NORTHERN SPY

An improved strain of the common Spy apple. We have selected it from the best trees we can find so as to get a Northern Spy that will color up early in the fall. Our Red Northern Spy will do this. Very popular for eating, and housewives demand it wherever it can be secured. Flesh is white, tender and sub-acid. **PRICED ABOVE.**

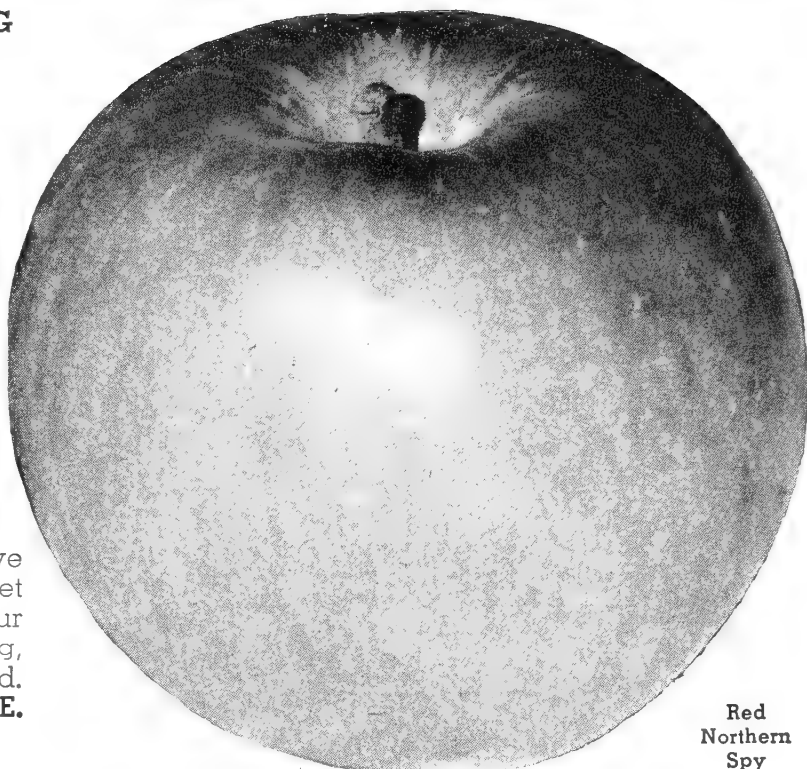

RED ROME

This variety is sometimes known as Gallia Beauty, but is simply an all-red strain of the old type Rome Beauty. It is very highly prized for baking purposes. Is almost a solid red, and the apple is produced on a tree which is very large in size. Has a white, crisp, delicious flavor, and is one of the very best varieties for winter storage. **PRICED ABOVE.**

DOUBLE-RED JONATHAN

Is a solid-red type of the Jonathan variety. It colors up very early in the fall, and enables you to pick your fruit a week to ten days before the common Jonathan will color up. The tree is medium in size, the fruit is firm, crisp and tender. Long lived, productive, and is a very early bearer. A wonderful winter apple. **PRICED ABOVE.**

**See Page 1 for Cash Discount
on Early Orders**

Red
Northern
Spy

YELLOW DELICIOUS

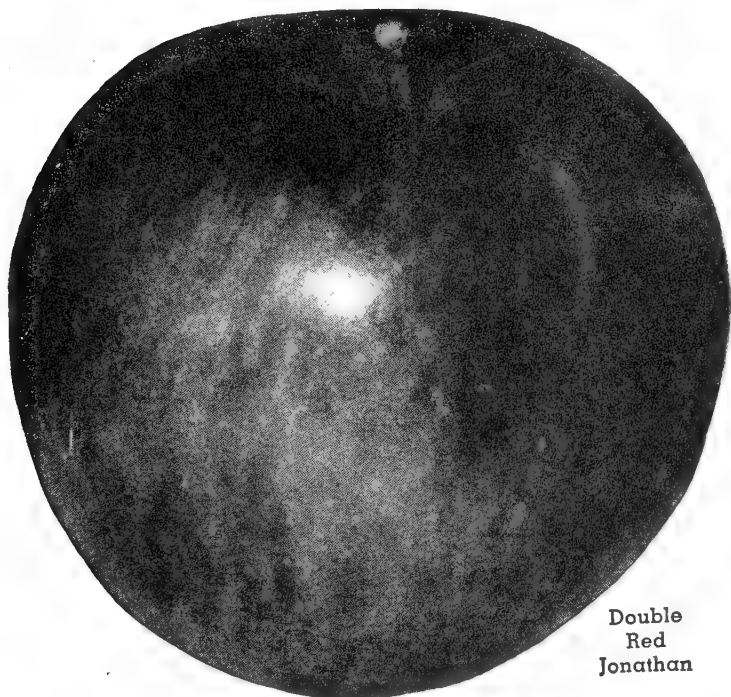

Is identical in shape and size with the ordinary red Delicious, but is completely yellow in appearance. Is sweetly acid in flavor, and the flesh is very firm, crisp and juicy. Is a splendid shipper. The trees we offer are all from parent trees that we selected for extra quality, size and vigor. Popular and profitable everywhere. **PRICED ABOVE.**

CORTLAND

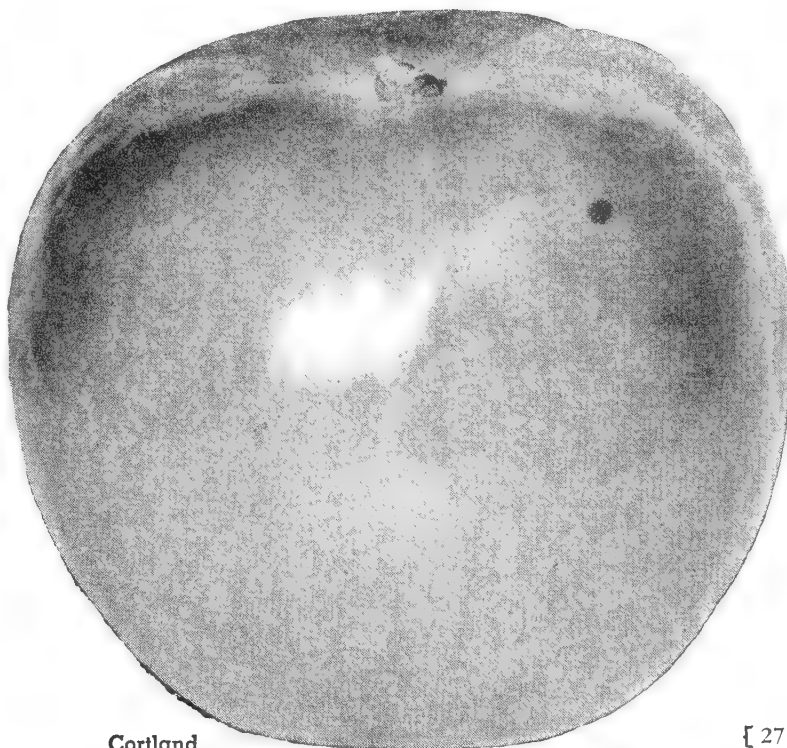

This variety is perhaps the finest of our fall apples. It is a cross of the common McIntosh and the old Ben Davis. It retains all the fine qualities of McIntosh, as to flavor, coloring, etc., but it also has the sticking qualities of Ben Davis. It sticks on the tree when the ordinary McIntosh falls to the ground. Extra-large, round apple of beautiful dark red color. Good shipper. **PRICED ABOVE.**

NOTICE

We cannot ship fruit trees into the following states: California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, and Washington.

Red
McIntosh

RED MCINTOSH

A superior strain of the old type McIntosh. It is practically all-red all over and retains its color and appearance well after being picked. It sticks to the tree a great deal better than does the common McIntosh. It is a very important Fall apple. Trees are very hardy and start to bear quite young. An exceptionally fine eating apple, of good size, bright red color, and a delicious aromatic flavor. **PRICED ABOVE.**

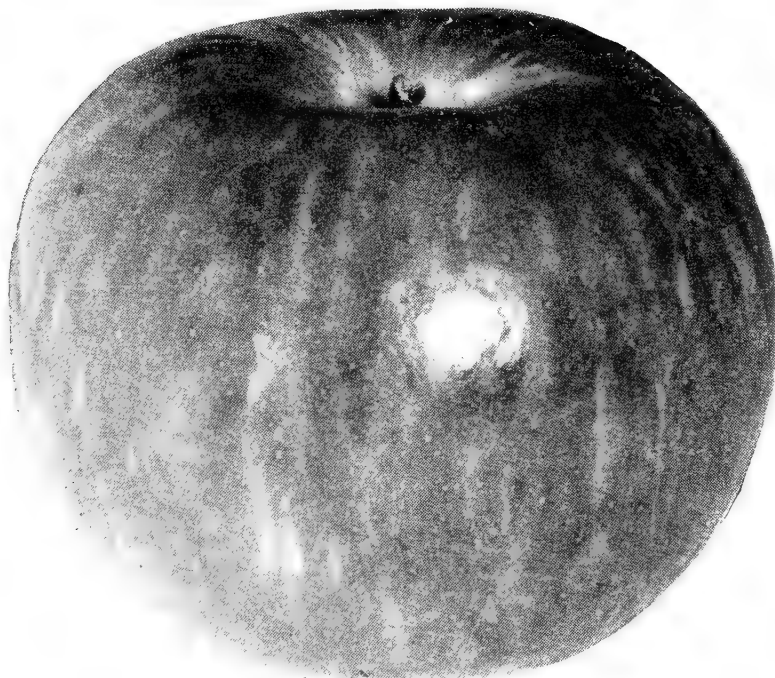

DUCHESS

One of the earliest of summer apples. It is produced on a tree which does not grow to an extremely large size, but is very hardy. An almost round apple of a brilliant yellow color with a slight red cheek. Very popular for pies or preserving purposes. **PRICED ABOVE.**

YELLOW TRANSPARENT

This variety is good to eat long before other varieties are ready. Is yellow in color; very crisp, juicy white flesh, and a delicious flavor. One of the best of the early varieties. Tree is very productive; grows rapidly, bears young, and is very profitable. **PRICED ABOVE.**

Yellow
Transparent

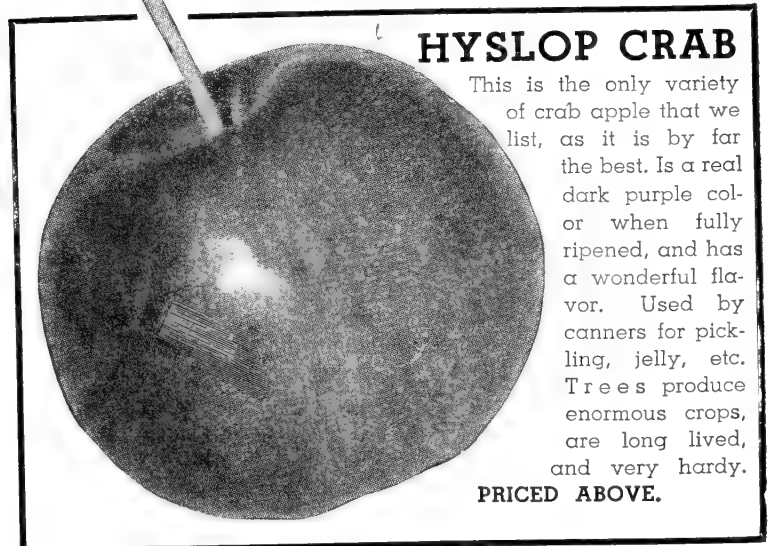

ANOKA

Noteworthy for its hardiness and the beautiful red striped fruit which it produces. Bears very early, often having fruit the second year. Fruit is of excellent quality, ripening shortly after Yellow Transparent. It is more adapted to the northern and central sections than the eastern seaboard belt. **PRICED ABOVE.**

HYSLOP CRAB

This is the only variety of crab apple that we list, as it is by far the best. Is a real dark purple color when fully ripened, and has a wonderful flavor. Used by canners for pickling, jelly, etc. Trees produce enormous crops, are long lived, and very hardy.

PRICED ABOVE.

Stahelin's Selected

GRAPE PLANTS

BIG PROFITS IN GROWING GRAPES

Seedless CONCORD

The only grape that is practically free of seeds. A beautiful blue-black variety that ripens about the same time as common Concord. Is perfectly hardy. Produces good large bunches that are delicious in flavor. Can be grown in any section where ordinary varieties grow. **Prices:** 1-yr. No. 1 plants, \$1.05 each; 4 for \$3.95; 6 for \$5.70; 10 for \$8.95; 20 for \$17.50.

CONCORD

Grows on all soils, producing enormous crops of large blue-black berries of highest quality fruit. Highly resistant to drought, insects and diseases. Ripens mid-September. America's leading wine and table grape. **Huge 3 yr. plants, 85c each. Other Plants Priced Below, at right.**

SENECA

Commonly called the skinless grapes. Golden honey colored, flavor sweet and delicious. Vine is vigorous and very productive. A fine grape for storage.

Prices: 1-yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.

VAN BUREN

Absolutely new, although it has been thoroughly tested in all grape growing sections. Luxuriant grower, producing compact and well shaped bunches of blue-black color. Exceptionally sweet. Extremely early, ripening 3 to 4 weeks before any other grape is on the market.

Prices: 1 yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.

GOLDEN MUSCAT

Bunches are of good size, brilliant yellow in color, and have a delicious flavor. Will do well wherever the Concord grows. Excellent shipper and producer. **Prices:** 1 yr. No. 1 plants, 80c each; 4 for \$3.00; 10 for \$7.00; 20 for \$13.25.

NIAGARA

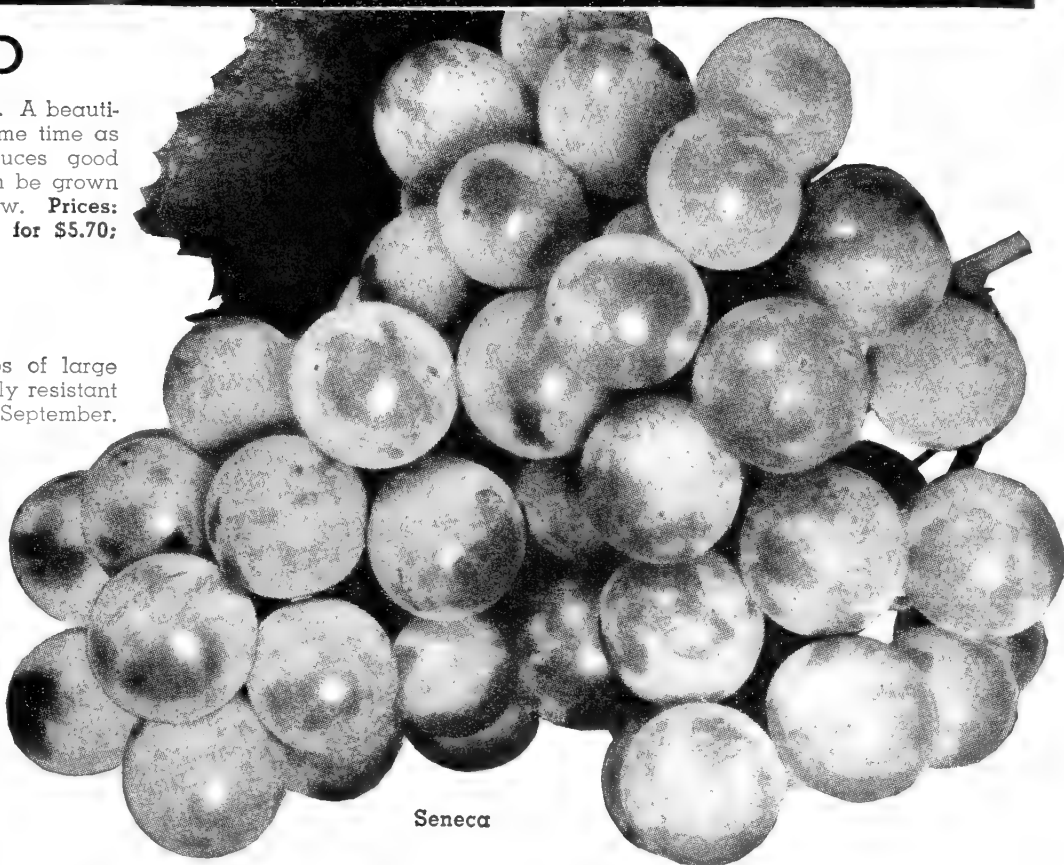

Leading commercial white grape. More productive than other white varieties. Berries are very large, and bunches compact. The quality of Niagara compares with Concord. **Priced above, at right.**

FREDONIA

A new early black grape, originated and thoroughly tested by the New York Experiment station. Bunch and berries are large with excellent flavor. Ripens fully 10 days before Moore's Early and is an excellent shipper. **Priced above, at right.**

DELAWARE

Small, compact bunch, sometimes shouldered. Berries are small, red, with thin skin, and unusually sweet. Ripens with Concord. Very hardy, and enormous producer. Long called the standard of excellence of all grapes as a table delicacy. **Priced above, at right.**

RED LAKE CURRANT

The finest Red Currant today. Originating in the northwest it is very hardy and will grow almost anywhere. Ripens mid-season.

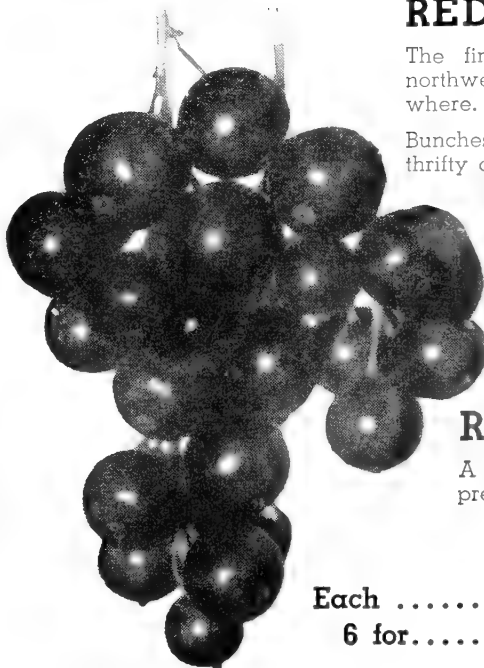

Bunches are large and very easily picked. Bush is thrifty and grows quite tall.

WILDER CURRANT

One of the most popular of Red Currants in this large currant-growing section; a fine commercial variety; large bunches and very firm.

RED CROSS CURRANT

A very highly prized variety that a lot of growers prefer; dark red, firm bunches and very reliable.

Stahelin's Hardy EVERGREENS

A Joy for Years to Come

DOUGLAS FIR

Fast and tall growing variety. Symmetrical shape with color varying from yellowish green to bluish green. Very beautiful and hardy. **PRICES:** 8 to 10 inch, twice transplanted, 85c each; 2 for \$1.50.

IRISH JUNIPER

A tall columnar type with silvery green foliage. Very erect and slender. Excellent for use at entrances. Reaches a height of 7 to 8 ft. at maturity or can be trimmed to any desired height. **PRICES:** 12 to 18 inch, twice transplanted, \$1.25 each; 2 for \$2.25.

PFITZER'S JUNIPER

Favorite of all spreading Junipers. Low, spreading bush with plumelike branches. Beautiful silvery blue-green foliage. Very hardy and will stand considerable shade. **PRICES:** 6 to 8 inch, twice transplanted, 85c each; 2 for \$1.50. 15 to 18 inch, B&B, \$2.75; 3 for \$7.50.

SAVIN JUNIPER

Rich dark green spreading type Juniper. Very similar to the Pfitzer. Ideal for use under windows. Height at maturity, 4 to 5 ft. **PRICES:** 8 to 10 inch, twice transplanted, \$1.20 each; 2 for \$2.15.

SPREADING YEW

This type of Yew is similar to the Pfitzer. Branches out from the bottom into a low bushy formation. Can be trimmed to desired height or to fit space. Foliage of dark green. **PRICES:** 8 to 10 inch, twice transplanted, \$1.20 each; 2 for \$2.25.

HATFIELD YEW

Grows in columnar, erect form. The color is extremely dark green, the foliage is heavy and luxuriant. Very hardy, easy to grow and does well in shade. **PRICES:** 10 to 12 inch, twice transplanted, \$1.45 each; 2 for \$2.60.

BLACK HILL SPRUCE

One of the hardiest of the Spruces. Bushy, compact, and usually symmetrical. Foliage from green to bluish green with branches close to the ground. **PRICES:** 9 to 12 inch, twice transplanted, 85c each; 3 for \$2.40; 10 for \$7.50.

PYRAMIDAL ARBORVITAE

Grows compact and develops into a perfect pyramidal form. Foliage of deep green, and retains its color through the season. Grows to a height of 12 to 15 ft. **PRICES:** 10 to 12 inch, twice transplanted, 95c each; 2 for \$1.80.

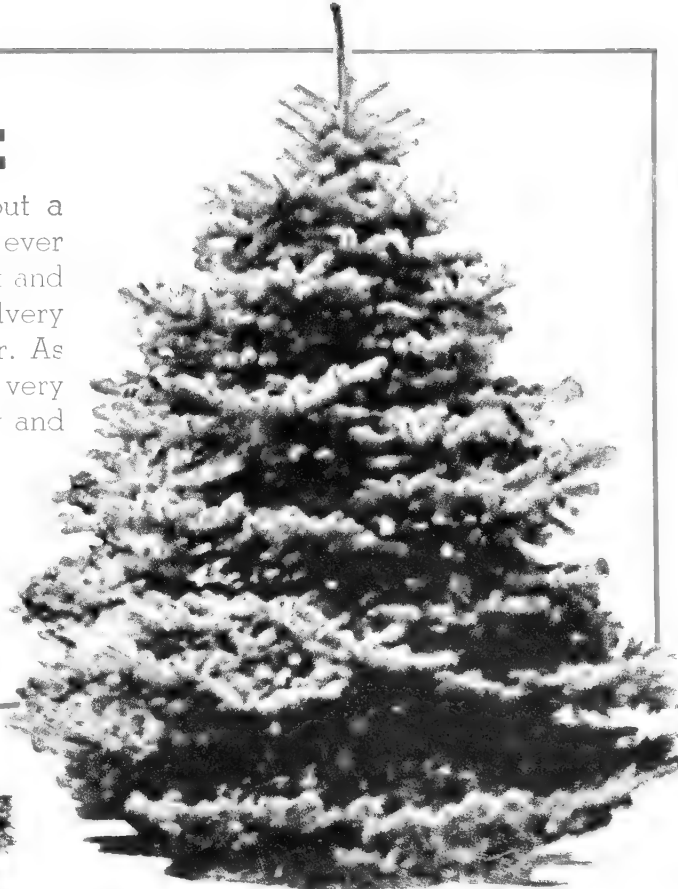

Year Around Beauty

COLORADO BLUE SPRUCE

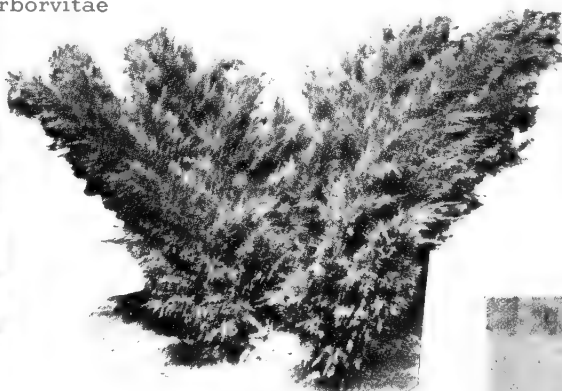

The Colorado Blue Spruce is without a doubt one of the finest of blue type ever green trees. It grows to a great height and is an ornamental tree of glistening silvery blue from early spring to midsummer. As originated in the cold section, it is very hardy and is perhaps the most showy and popular of all spruce trees. We have grown an especially fine lot of this spruce, the seeds taken from carefully selected trees so as to obtain the very finest of blue color.

PRICE: 8-10 in., twice transplanted, 85c each; 3 for \$2.40; 10 for \$7.50; 50 for \$35.00.

Universal Favorites

HYBRID TEA ROSES

PATENTED VARIETIES

FESTIVAL. Plant Patent No. 545. The beautiful rose which is actually thornless. Blooms monthly throughout the summer. One of the most popular new creations, this brilliant red rose is quick-growing, blooms six weeks after planting, and is outstanding in every way. **PRICE: \$1.50 each; 3 for \$3.75.**

PEACE. Plant Patent No. 591. Gorgeous, large, double blooms ranging from a deep yellow in bud to creamy yellow and finally to an alabaster edged with cerise, rose or apple-pink. Often several different shadings in bloom on a single plant. Blooms abundantly. Flowers have a lasting quality. **PEACE** has created a sensation throughout the country. Superior in every way. Unexcelled. **PRICE: \$2.00 each; 3 for \$5.00.**

MIRANDY. Plant Patent No. 632. A magnificent fragrant red rose with black shadings, opening to a gorgeous rich red. Exceptionally fine for cutting, as flowers display a beauty of form as the petals unfold and eventually become large full blooms of fifty petals with an exotic rose fragrance. **PRICE: \$1.50 each; 3 for \$3.75.**

NOCTURNE. Plant Patent No. 713. A rare red beauty with maroon shadings and long, gracefully shaped buds. A very strong grower, producing many flowers, each with an individual stem. A great favorite among rose lovers. **PRICE: \$1.50 each; 3 for \$3.75.**

SUPERIOR MODERN VARIETIES

PRICES: No. 1 Quality

80c each; 3 for \$2.35; 5 for \$3.75.

(excepting Patented varieties)

AMI QUINARD. A richly colored rose of deep velvety crimson. The exquisitely fragrant flowers are non-fading, and will be a welcome addition to your rose garden.

CONDESA DE SASTAGO. One of the greatest roses of all times. Petals of fiery copper-red on the inside and rich yellow on the outside. The unusual blooms are large and fragrant. Vigorous grower and free bloomer.

GOLDEN DAWN. The ideal garden rose. Lemon-yellow bud heavily accented with crimson, developing into a well-formed sweetly scented sunflower yellow bloom.

EDITH NELLIE PERKINS. A rose of outstanding merit, vigorous growth and free flowering. Large double flowers of unusual color, outside of petals Orient-red, shaded with cerise-orange, inside salmon pink.

EDITOR MacFARLAND. Deep rose-pink, shapely blooms with an exotic fragrance. Extremely hardy. A long-stemmed variety ideal for cutting.

RED RADIANCE. One of America's great red roses. An unusually hardy variety, thriving under most unfavorable conditions when other varieties fail. Continuous bloomer. Large flowers of clear even red, with true rose fragrance.

FOLLOWING 5 ROSES SHOWN IN COLOR Page 32

ROUGE MALLERIN. Non-fading brilliant red, opening into exceptionally large blooms of unusual formation and fragrance. Exquisite in every way.

PIERRE S. DU PONT. A glorious yellow beauty. Long pointed buds of reddish gold opening to a deep golden-yellow. Very fragrant and a profuse continuous bloomer.

THE DOCTOR. Internationally recognized as one of the outstanding new roses. The long pointed buds expand to simply enormous blooms. The color is an exquisite silvery pink with an intense fragrance.

CHRISTOPHER STONE. Large, semi-double vivid scarlet flowers, overlaid with velvety crimson. Has a delightful rose scent, and is extremely popular.

MME. JOS. PERRAUD. A lovely sweetly scented rose of beautiful shell-pink to orange shading. Long slender, pointed buds. Splendid for cutting.

Paul's Scarlet Climber

—CLIMBING ROSES—

For Porches, Fences, Trellises, and Arbors
For display and for color, hardly anything can equal the climbing roses in full bloom. If they are used on porches, fences, trellises or arbors, they greatly improve their beauty. All that we list are hardy. Plant 3 to 4 feet apart.

SILVER MOON—Large, semi-double, white flowers with just a faint ivory tinge and golden stamens in the center. **PRICES BELOW.**

PAUL'S SCARLET CLIMBER—Most popular red climbing rose. Matured plants are a solid mass of blazing scarlet. Color does not fade. **PRICES BELOW.**

CLIMBING AMERICAN BEAUTY—An old favorite. Large, double, deep rosy-pink flowers. Very fragrant and fine for cutting. **PRICES BELOW.**

GARDENIA—Beautiful glossy foliage with pale yellow buds opening into

delicate ivory with deeper yellow centers. **PRICES BELOW.**

CLIMBING DUPONT—Bright yellow rose of the dainty pillar type. **PRICES BELOW.**

PRICES: 75c each; 3 for \$2.10.

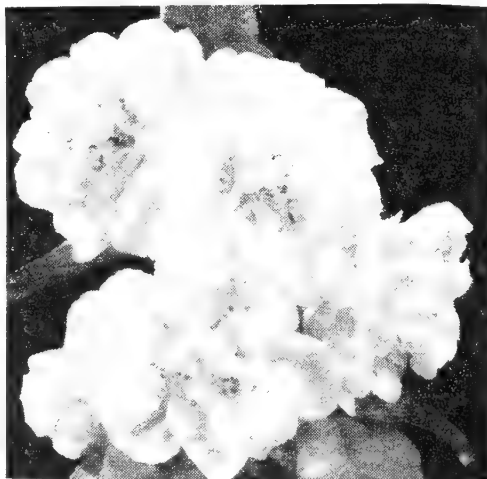

Tulip Tree

TULIP TREE

Tall, pyramidal, with broad glossy leaves. Bears tulip-like flowers of white with green centers in June. 3-4 ft. trees, 75c each; 3 for \$2.10.

BECHTEL'S FLOWERING CRAB

A hardy, small flowering tree. Double flowers of delicate pink resemble small Roses. Very fragrant. Ideal for the small lawn. 18-24 in. trees, 95c each; 3 for \$2.65.

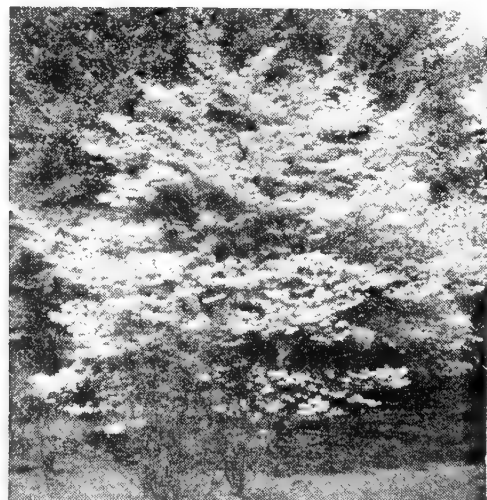

Bechtel's Flowering Crab

FLOWERING PEACH

One of the most attractive of the low growing, wide spreading trees. Flowers appear early in the spring before the tree leafs out and are so thick that they appear as a small cloud. Grows to a height of about 15 ft. at maturity. Available in red or white flowers. State Color. 4-5 ft. trees, \$1.35 each; 2 for \$2.25.

WHITE FLOWERING DOGWOOD

Large, white flowers with an extra row of center petals. Red berries in fall, also leaves turn red. Grows 10 to 15 feet tall. 3-4 ft. trees, \$1.25 each; 2 for \$2.25.

White Flowering Dogwood

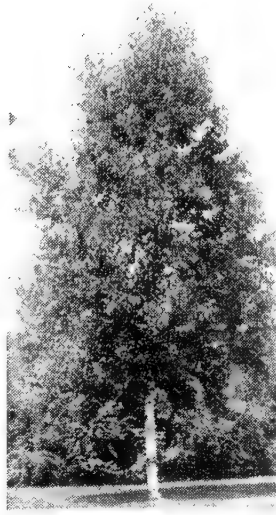

Flowering Peach

Stahelin's SHADE TREES for Beauty & Comfort

WHITE BIRCH, EUROPEAN

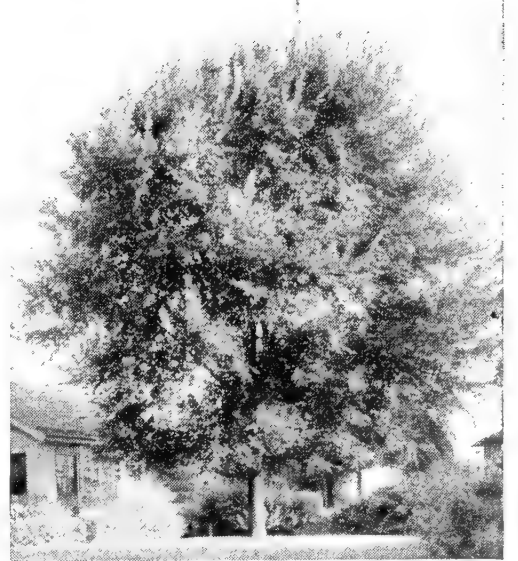

Hardy, tall-growing, upright tree. An excellent lawn tree of distinctive character, its creamy white bark contrasting sharply with its foliage. 5-6 ft. trees, each \$2.25; 3 for \$6.25.

White Birch, Er.

CHINESE ELM

Fastest growing shade tree today. Extra hardy and thrives anywhere. Useful for windbreaks and specimen plantings. 3-4 ft. trees, 55c each; 3 or more at 45c each. 5-6 trees, 65c each; 3 or more at 55c each. 7-8 ft. trees, \$1.35 each; 3 or more at \$1.25 each.

Chinese Elm

WISCONSIN WEEPING WILLOW

Graceful drooping. More slender leaves and hardier than the ordinary Babylonica. Rapid grower. 3-4 ft. trees, 75c each; 3 for \$2.10.

GOLDEN WEEPING WILLOW

Has golden yellow twigs with narrow green leaves. Slender branches hang in a beautiful arch to the ground. Hardy, grows fast. 3-4 ft. trees, 85c each; 3 for \$2.40.

SOFT MAPLE

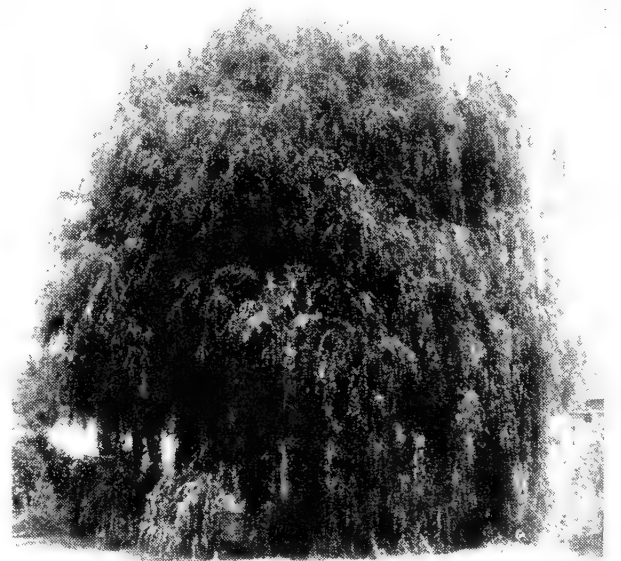

Dark green leaves with silvery surface underneath. Speedy grower, and thrives anywhere. Grows tall and makes a graceful, shapely head. 5-6 ft. trees, each 55c; 3 for \$1.50; 10 for \$4.50.

LOMBARDY POPULAR

Well known for its tall, slender, upright growth. Rapid grower on any soil. Dark green leaves, lighter shade on the under side. Roots do not clog drains. 5-6 ft. trees, 75c each; 3 for \$2.10.

AMERICAN ELM

Natural spreading and drooping tree. Favorite tree for street and general planting. Tall-growing, long-lived, and hardy. 4-5 ft. trees, each 35c; 3 for \$1.00.

Wisconsin Weeping Willow

"This is to inform you of the arrival in good condition of my trees. I was pleased that they were well rooted, well branched, and of good size. They would be hard to equal anywhere." C. O. Marshall, Barton County, Missouri.

Red Leaf Barberry

Buddleias

STAHHELIN'S *All Purpose*

FLOWERING ALMOND—This shrub blooms very early in the spring, even before the leaves appear. Every branch and twig is completely covered from top to bottom with small double shell-pink flowers which resemble small roses. Grows 3 to 4 feet tall. 24-30 inch plants, 95c; 3 for \$2.70.

CALYCANTHUS (Sweet Shrub)—An old garden favorite. Fragrant shrub with chocolate colored flowers and shiny green leaves. Blooms from May to October. Reaches a height of 8 to 10 feet. Strong, field-grown plants, 65c each; 3 for \$1.80.

RED FLOWERING DOGWOOD (Cornus Florida Rubra)—Red buds which open into exquisite four petaled deep pink flowers with yellowish-green centers. Red berries in fall. Trees grow 10 to 15 feet tall. 18-24 inch trees, \$2.65 each; 3 for \$7.50.

HIGHBUSH CRANBERRY—Brilliant green foliage with single white flowers in April and May, followed by clusters of scarlet berries in fall. Grows 8 to 10 feet tall. Field-grown plants, 65c each; 3 for \$1.65.

RED LEAF BARBERRY—Popular hedge of beautiful foliage. Dwarf-growing, uniformly bushy and rounded in form. Foliage changes with weather conditions. Red berries in the fall which remain throughout the winter. 6-9 in. plants, 6 for \$1.10; 25 for \$3.75; 50 for \$6.50; 100 for \$11.95. Specimen plants, 15-18 in., 50c each; 6 for \$2.75; 25 for \$9.75; 50 for \$15.95.

ALTHEA, Rose of Sharon—Large double blooms for midsummer until winter. Grows to a height of 6 to 8 ft. Ideal for backgrounds or shrub borders. Red or White. Strong field-grown plants, 50c each; 3 for \$1.35.

CRAPE MYRTLE—Beautiful shrub of the South. Flowers of beautiful clear colors with soft crepe-like texture. Should be given winter protection in northern states. Red or Pink. Selected 18-24 in. plants, 75c each; 3 for \$2.10.

FORSYTHIA, Golden Bell—Golden blossoms cover every limb and twig before the leaves are out. Grows 8 to 10 feet tall. Strong field-grown plants, 55c each; 3 for \$1.50.

DEUTZIA, Pride of Rochester—Masses of large white flowers tinged with pink cover the plant in May. Attains a height of 6 to 8 feet. Strong field-grown plants, 50c each; 3 for \$1.35.

BEAUTY BUSH (Kolkwitzia Amabilis)—Fragrant pink, tubular-shaped flowers, followed by fuzzy ornamental seed pods which remain all winter. 12-18 in. plants, 85c each; 3 for \$2.40.

BUDDLEIAS—Commonly known as the Butterfly Bush. Bloom from early summer to frost. Grow 3½ to 5 feet in height.

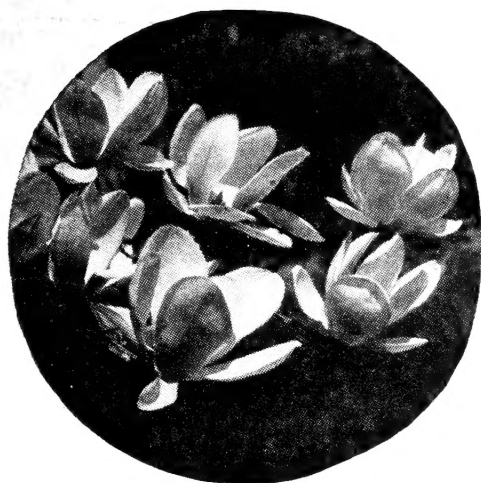

CHARMING—Pink.

ILE DE FRANCE—Rosy purple.

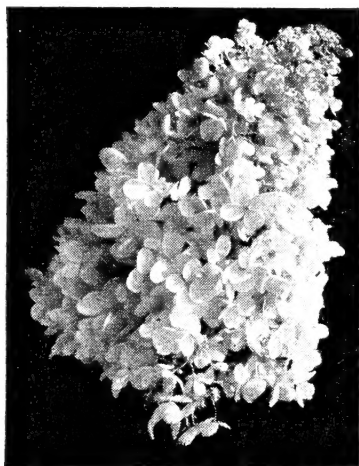

DUBONNET—Rich wine-red with slight purple overcast.

ORCHID BEAUTY—Brilliant orchid.

Price: Strong 2 yr. field-grown plants, 55c each; 2 for \$1.00.

Magnolia Soulangeana

Hydrangea, P. G.

Pink Honeysuckle

Hardy Flowering Shrubs

MAGNOLIA SOULANGEANA—Most popular and decorative of any of the Magnolias. Produces large rose-pink blooms before any leaves appear in the spring. Hardy. 18-24 in. branched trees, \$2.65 each; 3 for \$7.50.

HYDRANGEA, P. G.—Immense cone-shaped blooms, first white and then turning pink and bronze. Blooms in August with panicles measuring 8 to 12 inches long. Makes a fine winter decoration if allowed to dry on the bush. Field-grown plants, 85c each; 3 for \$2.40.

GOLD FLAME HONEYSUCKLE—A new variety that is hardy and will grow any place. Large rose-red trumpets lined with a light to deep golden yellow. Good for trellises. Field-grown plants, 95c each; 3 for \$2.70.

PERSIAN LILAC—Graceful, drooping branches with small foliage and flowers of bright purple. Blooms in May and June and reaches a height of 6 to 8 feet at maturity. Field-grown plants, 55c each; 3 for \$1.50.

FLOWERING QUINCE—Produces brilliant scarlet-red flowers with yellow stamens, covering the bush from May until June. The fragrant Yellow quinces make delicious jelly. Grows 6 to 8 feet tall. Field-grown plants, 65c each; 3 for \$1.65.

MAY DAY TREE—The first tree to leaf out in the spring and bloom. Fragrant pure white flowers which resemble Lilacs in shape. Lovely for cutting. Flowers are followed by small edible fruit. 3-4 ft. trees, 95c each; 3 for \$2.70.

PINK HONEYSUCKLE—Bright pink flowers in spring, followed by loads of bright red berries in the fall. Thrives in the shade or in the sun. Grows to a height of 5 to 6 ft. Field-grown plants, 55c each; 3 for \$1.50.

WEIGELA, ROSEA—Tall and vigorous growing with large, trumpet-shaped, rosy-pink flowers in thick clusters along each branch in June. Grows 4 to 5 feet tall, and can be trimmed as desired. Field-grown plants, 50c each; 3 for \$1.35.

MOCK ORANGE—A tall bush with dark green foliage. Large white flowers in June. Very sweet fragrance, and fine for cutting. Hardy. Strong field-grown plants, 50c each; 3 for \$1.35.

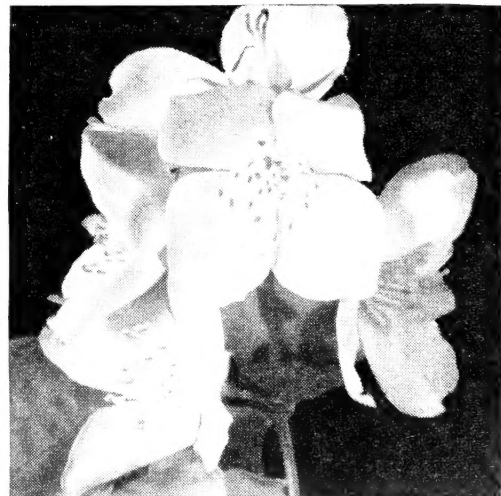

HALL'S JAPAN HONEYSUCKLE—Very strong and vigorous growing. Produces pure white flowers gradually changing to yellow. Blooms the entire summer. Very fragrant. Field-grown plants, 60c each; 3 for \$1.50.

WEIGELA, EVA RATHKE—A free bloomer, starting in June and continuing to bloom at various intervals until fall. Flowers are of brilliant crimson and trumpet shaped. Field-grown plants, 65c each; 3 for \$1.75.

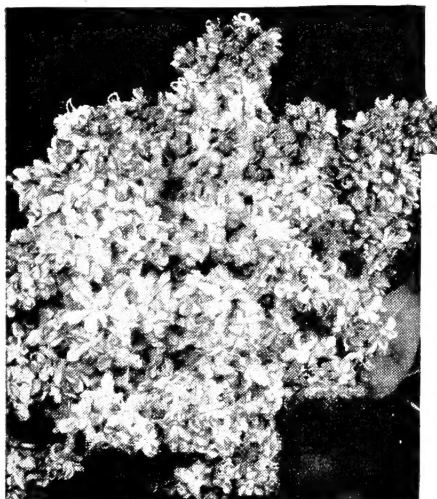

HANSEN'S BUSH CHERRY—Fruit is plum-shaped, but the size of a sweet cherry. Fruit grows in clusters, and makes a beautiful shrub. Very easy to grow and good to eat out of hand. White flowers in spring and maroon-red leaves in fall. 18-24 in. branched transplants, 50c each; 3 for \$1.35; 20 for \$7.65.

Weigela, Rosea

Mock Orange

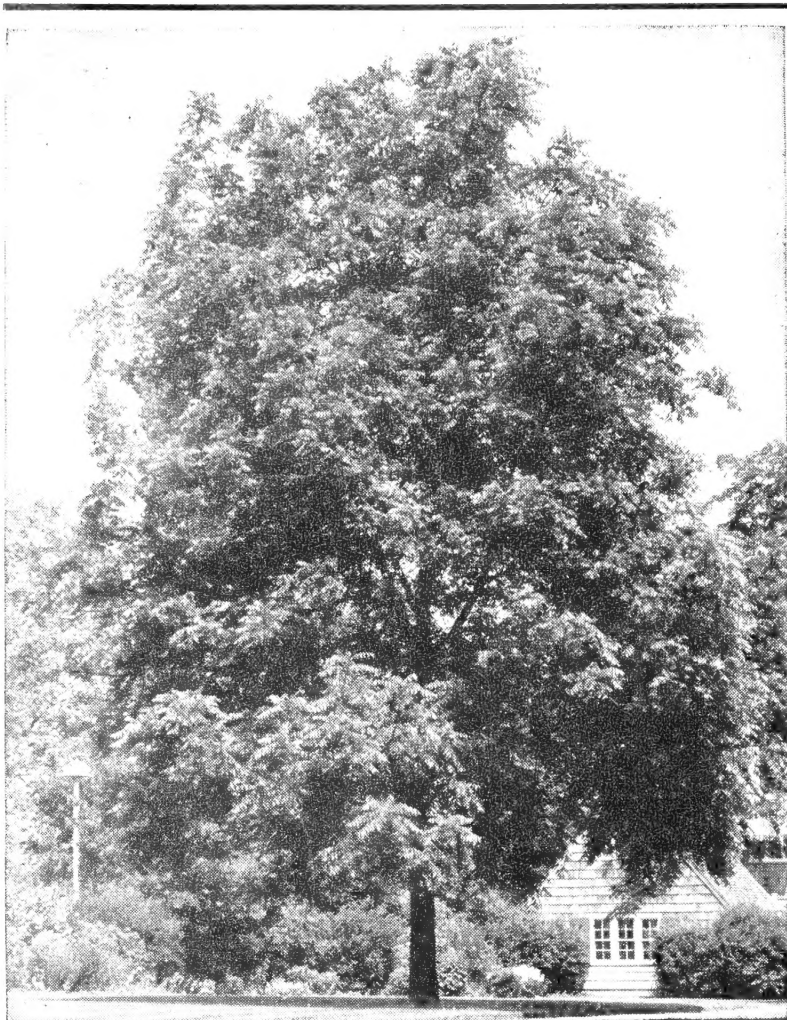

Persian Lilac

Flowering Quince

Gold Flame

Black Walnut Tree

THOMAS BLACK WALNUT

The Thomas Black Walnut produces nuts of giant size with extremely large kernels, and is a grafted tree. It starts producing the second year after it is planted.

Produces Huge Crop Per Tree

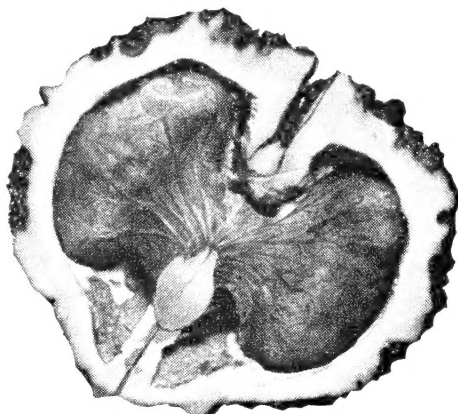

At maturity, this tree will bear 15 to 40 bushels. We recommend that you plant at least two for your own use. Set 50 feet apart, 2 to 3 inches deeper than it has been set in the nursery. Very valuable for logs, or as an ornamental tree, and as a producer of profitable crop. We list only grafted trees.

PRICE: 18-24 in. trees, \$1.75 each; 2 for \$3.25; 6 for \$9.00; 2-3 ft. trees, \$2.50 each; 2 for \$4.50; 6 for \$12.00.

NATIVE BLACK WALNUT

Stahelin's Black Walnuts are grown from seed produced on our own farms from the Thomas, Stabler and Weir varieties. While not as thin shelled as the nuts from cultivated trees, they are excellent and you still have a better Black Walnut.

Prices: 2-3 ft. trees, 65c each; 3 for \$1.50; 10 for \$4.25; 3-4 ft. trees, 75c each; 3 for \$2.10; 10 for \$6.50.

Hardy ENGLISH WALNUTS

NORTHERNGROWN, THIN-SHELL

Plant Nut Trees for Profit, Beauty, Shade and Pleasure

The Hardy English Walnut as we have will grow in practically any type of soil that is not excessively wet. Their hardiness and rapidity of growth, their long life and beauty, and finally their timber makes them very desirable and interesting for those that have a little room in which to plant trees. They require no special care and they add greatly to the value of any property on which they may be planted.

The Hardy English Walnut which we have is the result of many years of experimentation and of guaranteed proven quality. Extensive plantings have been made in many midwestern states as well as the states below the Mason and Dixon line. All have proven successful.

The English Walnut is ornamental, and does not look like any other tree. It gives an abundance of shade and like many other trees is not always fertile. Therefore, we suggest that more than one should be planted for cross pollination, and guaranteed success. This is a tree that we personally think everyone should plant. They are not common. They excite much interest. They are beautiful in appearance, make a lot of shade, and will produce a fine crop for you when the ordinary shade tree produces nothing.

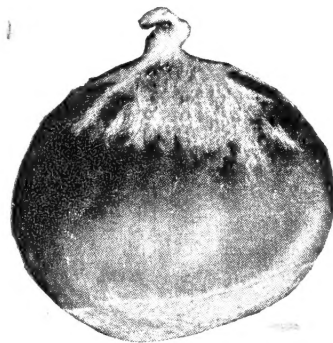

PRICE: 2½-3 ft. trees, \$2.75 each; 2 for \$4.95; 5 for \$11.25; 3-4 ft. trees, \$3.50 each; 2 for \$6.45; 5 for \$14.95.

**FREE CULTURAL INSTRUCTIONS FOR ALL NUT TREES
INCLUDED WITH ORDER IF REQUESTED.**

Chinese CHESTNUTS

The Chinese Chestnut is the only Chestnut that we know of that is blight resistant. The seed from which our trees are grown are all collected from trees that are known to be true blight resistant and so isolated that the pollen from other Chestnut trees cannot mix with them. We offer these trees in two sizes, 2-3 and 3-4 ft., and both will be very well rooted but by buying the large size trees you will save several years time and they will come into bearing that much quicker.

PRICE: 3 yr. 2-3 ft. trees, \$1.75 each; 3 for \$4.50; 4 yr. 3-4 ft. trees, \$2.25 each; 3 for \$5.95.

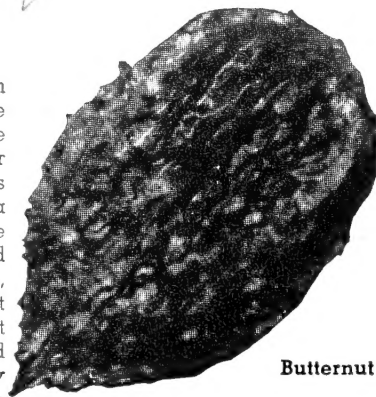

Chinese Chestnut

BUTTERNUT

This native nut tree grows in almost every section of the United States. Attains large size at maturity. Starts to bear very early, about 3 to 5 years of age, and will produce a crop annually. The native Butternut is a conical shaped nut that is very nutritious, carrying a very large amount of oil. It grows very easy. It makes an excellent shade and you can plant them in any corner or other sections where ordinary trees cannot be produced, as they require no spraying.

PRICES: 2 yr. 2-3 ft. trees, 95c each; 3 for \$2.70; 10 for \$7.50.

Butternut

Hardy ENGLISH WALNUTS

It has only been in recent years that these Hardy English or paper shell Persian Walnut trees have been available. These trees grow in many parts of the world; the hardest being found in Poland and the Northern Carpathian mountains where the temperature drops to much below zero. The nuts from these trees will vary in size from that of the California English Walnut to three times that size. They fall free of the hull. In Canada where our trees had their source, this variety has been a very heavy producer and thousands are now growing in many of the northern states. Further description and prices on opposite page. **PRICE:** 2½-3 ft. branched trees, \$2.75 each.

See page 40 for additional prices.

The English Walnut trees which we offer are of such size that they readily transplant. Smaller trees quickly catch up with, and outgrow the large size trees when moved and the cost is much lower.

HARDY PECANS

We have spent a lot of time and effort to secure or locate Pecans which will be suitable for our customers. From Ontario, Canada, we have finally secured a source of good seed, and can now offer you a Northern Pecan which is as hardy as any Hickory nut, and should not be confused with the Southern Pecan. These trees grow naturally on overflow lands, but they will grow any place where you have good soil. They are very able to adapt themselves to different conditions. They make a beautiful ornamental tree, growing to a great height in the course of time, and will produce a wonderful crop of nuts if conditions are right. **PRICE:** 18-24 in. trees, each .85¢; 3 for \$2.40; 10 for \$6.95. 2-3 ft. trees, each \$1.25; 3 for \$3.50; 10 for \$10.95.

HARDY HAZELNUTS

The Hazelnut trees which we offer this year are nursery grown stock, will be very well rooted, branched and will grow much better than the wild native Hazelnuts which are usually offered. Makes a fine, well branched shrub, 5 to 6 ft. tall and attractive enough to plant in your yard. In the fall the foliage is beautiful with scarlet and bronze leaves. The bush at that time will be completely covered with nuts. Will grow practically anywhere, and will produce huge crops. Bears very early. **PRICE:** 18-24 in. 2 Yr. branched trees, .85c each; 3 for \$2.40; 10 for \$6.95

FRENCH *Lilacs*

One of the finest of all shrubs. Their beauty is so great that it cannot be described accurately. They bloom very young and every year adds to their beauty. Last a lifetime and grow to a height of 6 to 8 feet. During their blooming period they are entirely covered with a profusion of blooms which are extremely fragrant. Available in the following varieties:

Charles Joly. Purple red. One of the best of the double dark reds.

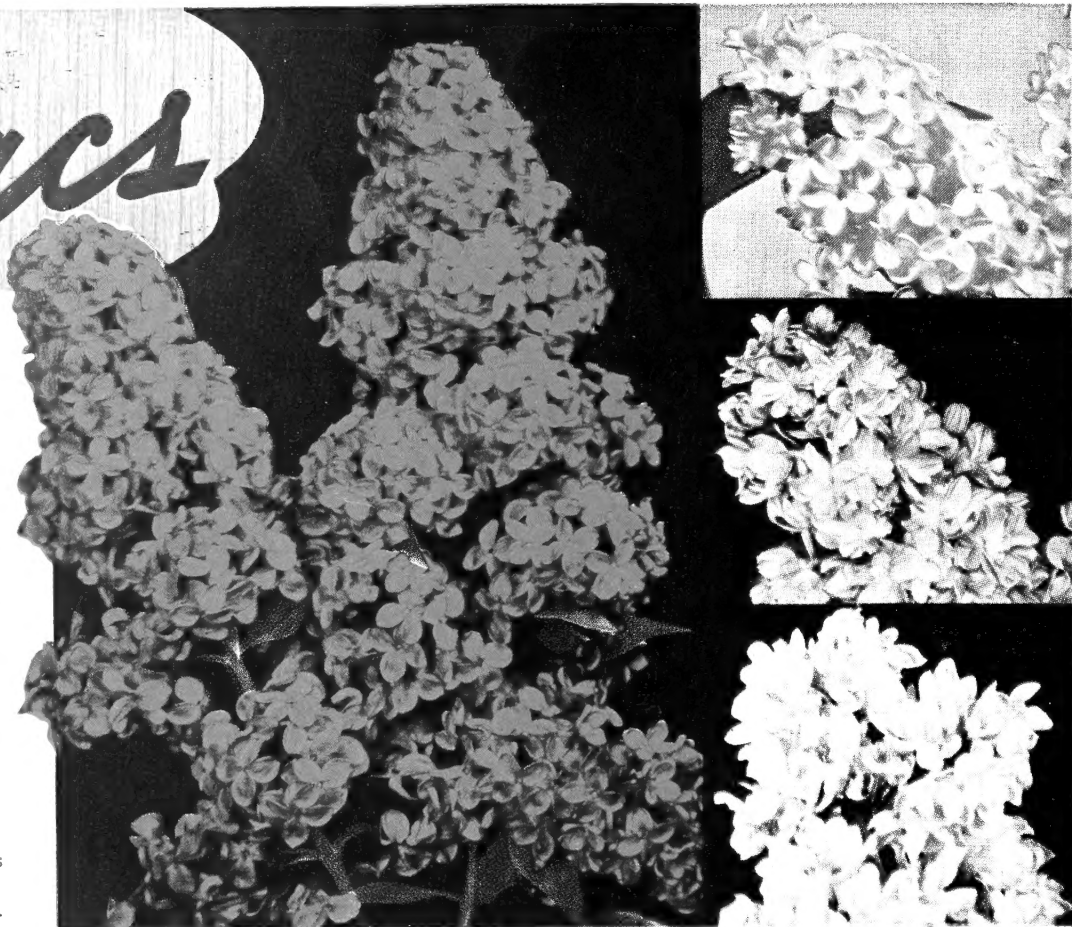

President Grevy. Light blue. Immense double panicles of clear delicate blue.

Charles X. A deep rose red. An older variety popular for its profuse blooming qualities.

Mme. Florent Stepman. Very large, beautifully formed panicles of pure white. Tall, upright grower; good foliage.

PRICE: 18 to 24 in., well rooted plants—Each \$1.25; 3 for \$3.25.

SPECIAL OFFER: 1 each of the 4 colors pictured for \$3.95.

RED NORWAY MAPLE

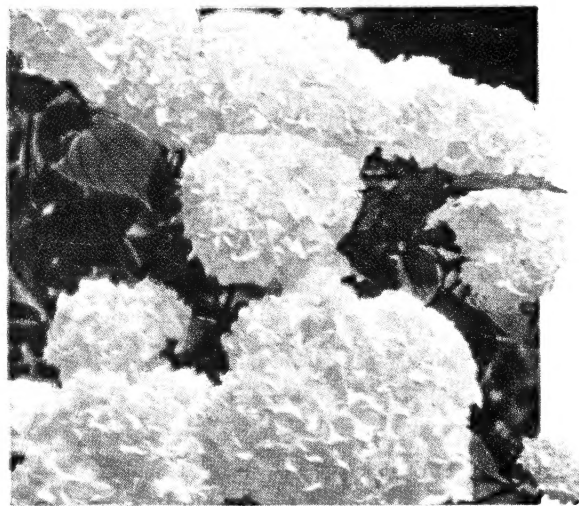

Crimson King

(Patent No. 735)

In offering you the Crimson King Maple, we are giving you an opportunity to purchase one of the most beautiful of all red-leaved trees. It grows identical with the common maple, and to the same size, but is covered with extremely blood-red leaves the entire year, and is hardy.

It was originated in Norway. It is creating a sensation in the United States today, and we are very fortunate in having a limited amount of these trees to offer. Unfortunately, only small-sized trees are available, but these 2-year-old trees will grow rapidly, and become beautiful showy trees in a short time. This is distinctly a new red novelty which has been proven to be entirely hardy, and retains beautiful red leaves throughout the season.

Price: 3 to 4 ft. \$2.75 each. 3 for \$7.50.

BLUE HYDRANGEA

This is the most perfect of all the Blue Hydrangeas. Does best under acid soil conditions and will grow in 50% shade. At maturity it will be from 2 to 3 feet in height and a mass of solid blue flowers.

Strong 2 yr. field grown plants, \$1.25 each; 3 for \$3.25.
